Carlson, Peter David Joralemon, Indianapolis Museum of Art, 1988 For archaeologists artists art historians and all lovers of art especially pre Columbian art Choice one of the better general pre Columbian catalogues to appear in a long time African Arts More than 150 examples of Olmec and Maya art are described in detail discussed and reproduced in magnificent full color photographs The collection is grouped into cultural and geographical sections to give a complete picture of the most significant civilizations of ancient Latin America      **Legends and Lore of Ancient America**  
Frank Joseph, 1900-01-01 If you want to spark young people s interest in history teach them about the undocumented legends they won t find in their traditional history books This title offers readers a juicy retelling of what some people speculate is an alternate history of the Americas From Vikings maps of America hundreds of years before Columbus to the discovery of a lost Christian colony in prehistoric Michigan this book dares to uncover some of history s most controversial legends

**Discovering the Mysteries of Ancient America** Frank Joseph, Zecharia Sitchin, 2006-01-01 In Discovering the Mysteries of Ancient America the author of The Atlantis Encyclopedia turns his sextant towards this hemisphere Here is a collection of the most controversial articles selected from seventy issues of the infamous Ancient American magazine They range from the discovery of Roman relics in Arizona and California s Chinese treasure to Viking rune stones in Minnesota and Oklahoma and the mysterious religions of ancient Americans      *They Came Before Columbus: The African Presence in Ancient America* Ivan Van Sertima, They Came Before Columbus reveals a compelling dramatic and superbly detailed documentation of the presence and legacy of Africans in ancient America Examining navigation and shipbuilding cultural analogies between Native Americans and Africans the transportation of plants animals and textiles between the continents and the diaries journals and oral accounts of the explorers themselves Ivan Van Sertima builds a pyramid of evidence to support his claim of an African presence in the New World centuries before Columbus Combining impressive scholarship with a novelist s gift for storytelling Van Sertima re creates some of the most powerful scenes of human history the launching of the great ships of Mali in 1310 two hundred master boats and two hundred supply boats the sea expedition of the Mandingo king in 1311 and many others In They Came Before Columbus we see clearly the unmistakable face and handprint of black Africans in pre Columbian America and their overwhelming impact on the civilizations they encountered      The Lost Colonies of Ancient America Frank Joseph, 2013-10-21 Was America truly unknown to the outside world until Christopher Columbus discovered it in 1492 Could a people gifted enough to raise the Great Pyramid more than 4 000 years ago have lacked the skills necessary to build a ship capable of crossing the Atlantic Did the Phoenicians who circumnavigated the African continent in 600 bc never consider sailing farther Were the Vikings the most fearless warriors and seafarers of all

time terrified at the prospect of a transoceanic voyage If so how are we to account for an Egyptian temple accidentally unearthed by Tennessee Valley Authority workers in 1935 What is a beautifully crafted metal plate with the image of a Phoenician woman doing in the Utah desert And who can explain the discovery of Viking houses and wharves excavated outside of Boston These enigmas are but a tiny fraction of the abundant physical proof for Old World visitors to our continent hundreds and thousands of years ago In addition Sumerians Minoans Romans Celts ancient Hebrews Indonesians Africans Chinese Japanese Welsh Irish and the Knights Templar all made their indelible if neglected mark on our land Spiritual Turning Points of North American History Luigi Morelli, 2010-10 This introduction to modern Indian thought establishes the historical context in which Indian thinkers of the past century developed their ideas showing how those ideas comprise a coherent vision that is both Indian and contemporary The Spirit of Modern India offers a full treatment of these ideas in an intelligible and concise approach and format Despite a growing interest in Indian thought and life the best writings of major twentieth century thinkers have not been well presented within their cultural framework This is the first single volume to offer such a wide representation of India's experience and scholarship through traditional and contemporary strains as articulated by her greatest modern thinkers The period designated modern refers to the remarkable century between the mid 1800s and the mid 1900s The Spirit of Modern India includes writings by Sri Ramakrishna Vivekananda Tagore Gandhi Nehru Radhakrishnan and Sri Aurobindo These writings are arranged according to each era of Indian thought and culture philosophy religion ethics education esthetics and national vision Each is introduced to illuminate the material and put the selections into their historical and cultural context A chronology lists important dates and works of major authors and dates related to Indian and Western intellectual history A glossary of important names and terms makes the more technical selections readily accessible The bibliography will guide the reader to further reading The Spirit of Modern India provides a valuable service to those who wish to better understand India and its modern roots

Esposito, 2000-05-11 Islam is the fastest growing religion in the United States There are more Muslims in America than in Kuwait Qatar and Libya together Leaving aside immigration and conversion birthrate alone ensures that in the first part of the twenty first century Islam will replace Judaism as the nation's second largest religion Like all religious minorities in America Muslims must confront a host of difficult questions concerning faith and national identity Can they become part of a pluralistic American society without sacrificing their identity Can Muslims be Muslims in a state that is not governed by Islamic law Will the American legal system protect Muslim religious and cultural differences Is there a contradiction between demanding equal rights and insisting on maintaining a distinctively separate identity Will the secular and or Judeo Christian values of American society inhibit the Muslim practice of religious faith While the Muslims of America are indeed on the path to Americanization what that means and what that will yield remains uncertain In this thoughtful and wide ranging volume fourteen distinguished scholars take an in depth look at these issues

Voyages of the Pyramid Builders Robert M. Schoch, 2004-05-24 Is it a mere coincidence that pyramids are found throughout our globe Did cultures ranging across vast spaces in geography and time such as the ancient Egyptians early Buddhists the Maya Inca Toltec and Aztec civilizations of the Americas the Celts of the British Isles and even the Mississippi Indians of pre Columbus Illinois simply dream the same dreams and envision the same structures Robert M Schoch one of the world s preeminent geologists in recasting the date of the building of the Great Sphinx believes otherwise In this dramatic and meticulously reasoned book Schoch like anthropologist Thor Heyerdahl in his classic Kon Tiki argues that ancient cultures traveled great distances by sea Indeed he believes that primeval sailors traveled from the Eastern continent primarily Southeast Asia and spread the idea of pyramids across the globe particularly to the New World of the Americas where they abounded until the days of the Conquistadors

Ancient Ocean Crossings Stephen C. Jett, 2017-06-06 Paints a compelling picture of impressive pre Columbian cultures and Old World civilizations that contrary to many prevailing notions were not isolated from one another In Ancient Ocean Crossings Reconsidering the Case for Contacts with the Pre Columbian Americas Stephen Jett encourages readers to reevaluate the common belief that there was no significant interchange between the chiefdoms and civilizations of Eurasia and Africa and peoples who occupied the alleged terra incognita beyond the great oceans More than a hundred centuries separate the time that Ice Age hunters are conventionally thought to have crossed a land bridge from Asia into North America and the arrival of Columbus in the Bahamas in 1492 Traditional belief has long held that earth s two hemispheres were essentially cut off from one another as a result of the post Pleistocene meltwater fed rising oceans that covered that bridge The oceans along with arctic climates and daunting terrestrial distances formed impermeable barriers to interhemispheric communication This viewpoint implies that the cultures of the Old World and those of the Americas developed independently Drawing on abundant and concrete evidence to support his theory for significant pre Columbian contacts Jett suggests that many ancient peoples had both the seafaring capabilities and the motives to cross the oceans and in fact did so repeatedly and with great impact His deep and broad work synthesizes information and ideas from archaeology geography linguistics climatology oceanography ethnobotany genetics medicine and the history of navigation and seafaring
