Health Care Off the Books Danielle T. Raudenbush,2020-02-11 Millions of low income African Americans in the United States lack access to health care How do they treat their health care problems In Health Care Off the Books Danielle T Raudenbush provides an answer that challenges public perceptions and prior scholarly work Informed by three and a half years of fieldwork in a public housing development Raudenbush shows how residents who face obstacles to health care gain access to pharmaceutical drugs medical equipment physician reference manuals and insurance cards by mobilizing social networks that include not only their neighbors but also local physicians However membership in these social networks is not universal and some residents

are forced to turn to a robust street market to obtain medicine For others health problems simply go untreated Raudenbush reconceptualizes U S health care as a formal informal hybrid system and explains why many residents who do have access to health services also turn to informal strategies to treat their health problems While the practices described in the book may at times be beneficial to people s health they also have the potential to do serious harm By understanding this hybrid system we can evaluate its effects and gain new insight into the sources of social and racial disparities in health outcomes

Socioculturally Attuned Family Therapy Teresa McDowell, Carmen Knudson-Martin, J. Maria Bermudez, 2022-09-28. Socioculturally Attuned Family Therapy 2nd edition is a fully updated and essential textbook that addresses the need for marriage and family therapists to engage in socially responsible practice by infusing diversity, equity, and inclusion throughout theory and clinical practice. Written accessibly by leaders in the field, this new edition explores why sociocultural attunement and equity matter, providing students and clinicians with integrative equity-based family therapy guidelines and case illustrations that clinicians can apply to their practice. The authors integrate principles of societal context, power, and equity into the core concepts and practice of ten major family therapy models, such as structural family therapy, narrative family therapy, and Bowen family systems, with this new edition including a chapter on socio-emotional relationship therapy. Paying close attention to the how-to's of change processes, updates include the use of more diverse voices that describe the creative application of this framework, the use of reflexive questions that can be used in class, and further content on supervision. It shows how the authors have moved their thinking forward, such as in clinical thinking, change, and ethics infused in everyday practice from a third-order perspective, and the limits and applicability of SCAFT as a trans-theoretical, transnational approach. Fitting COAMFTE, CACREP, APA, and CSWE requirements for social justice and cultural diversity, this new edition is revised to include current cultural and societal changes, such as Black Lives Matter, other social movements, and environmental justice. It is an essential textbook for students of marriage, couple, and family therapy, and important reading for family therapists, supervisors, counselors, and any practitioner wanting to apply a critical consciousness to their work.

Following an Introduction, the book is structured around four main themes: Adult Education and Social Justice, Decolonisation, Post-Colonialism, and Indigenous Knowledge, From Literacy to Lifelong Learning, and Fostering Excellence, Policy Development, and

Taylor, 2015-01-09 For close to a century the field of community criminology has examined the causes and consequences of community crime and delinquency rates Nevertheless there is still a lot we do not know about the dynamics behind these connections In this book Ralph Taylor argues that obstacles to deepening our understanding of community crime links arise in part because most scholars have overlooked four fundamental concerns how conceptual frames depend on the geographic units and or temporal units used how to establish the meaning of theoretically central ecological empirical indicators and how to think about the causes and consequences of non random selection dynamics The volume organizes these four conceptual challenges using a common meta analytic framework The framework pinpoints critical features of and gaps in

current theories about communities and crime connects these concerns to current debates in both criminology and the philosophy of social science and sketches the types of theory testing needed in the future if we are to grow our understanding of the causes and consequences of community crime rates Taylor explains that a common meta theoretical frame provides a grammar for thinking critically about current theories and simultaneously allows presenting these four topics and their connections in a unified manner The volume provides an orientation to current and past scholarship in this area by describing three distinct but related community crime sequences involving delinquents adult offenders and victims These sequences highlight community justice dynamics thereby raising questions about frequently used crime indicators in this area of research A groundbreaking work melding past scholarly practices in criminology with the field s current needs Community Criminology is an essential work for criminologists
