The Sociology of Military Science Colonel (US Army Ret.) Chris Paparone, 2012-11-08 This groundbreaking work challenges modernist military science and explores how a more open design epistemology is becoming an attractive alternative to a military staff culture rooted in a monistic scientific paradigm The author offers fresh sociological avenues to become more institutionally reflexive to offer a variety of design frames of reference beyond those typified by modern military doctrine Modernist military knowledge has been institutionalized to the point that blinds militaries to alternative designs organizationally and in their interventions This book seeks to reconstruct strategy and operations in designing ways and develops theories of action through multifaceted contextualizations and recontextualizations of situations showing that Military Design does not have to rely on set rational analytic decision making schemes but on seeking alternative meanings in and on action The work offers an alternative philosophy of practice that embraces the unpredictability of tasks to be accomplished Written by Colonel Paparone U S Army Ret PhD with a special chapter by two active duty officers it will appeal to all in military and security studies including professionals and policymakers

Making the Soldier Decisive on Future Battlefields National Research Council, Division on Engineering and Physical Sciences, Board on Army Science and Technology, Committee on Making the Soldier Decisive on Future Battlefields, 2013-06-10 The U S military does not believe its soldiers sailors airmen and marines should be engaged in combat with adversaries on a level playing field Our combat individuals enter engagements to win To that end the United States has used its technical prowess and industrial capability to develop decisive weapons that overmatch those of potential enemies In its current engagement what has been identified as an era of persistent conflict the nation's most important weapon is the dismounted soldier operating in small units Today's soldier must be prepared to contend with both regular and irregular adversaries Results in Iraq and Afghanistan show that while the U S soldier is a formidable fighter the contemporary suite of equipment and support does not afford the same high degree of overmatch capability exhibited by large weapons platforms yet it is the soldier who ultimately will play the decisive role in restoring stability Making the Soldier Decisive on Future Battlefields establishes the technical requirements for overmatch capability for dismounted soldiers operating individually or in small units It prescribes technological and organizational capabilities needed to make the dismounted soldier a decisive weapon in a changing uncertain and complex future environment and provides the Army with 15 recommendations on how to focus its efforts to enable the soldier and tactical small unit TSU to achieve overmatch

Transhumanizing War H. Christian Breede, Stéphanie A.H. Bélanger, Stéfanie von Hlatky, 2020-04-09 The concept of soldier enhancement often invokes images of dystopian futures populated with dehumanized military personnel These futures serve as warnings in science fiction works and yet the enhancement of soldiers combat capability is almost as old as war itself Today soldier enhancement is the purpose of military training and the application of innovative technologies but when does it begin to challenge individuals very humanity Bringing together the work of a diverse group of practitioners and academics Transhumanizing War examines performance enhancement in the military from a wide range of perspectives The book builds on two key premises that rapid advances in science and technology are outstripping governments and military organizations capacity to adapt and that this has put pressure on the connection between the military and the public The contributors to this collection grapple with the implications of continued technological advancement and the possibility that innovative solutions to performance enhancement will risk further alienating the soldier from society Navigating the fine line between technological promise and ethics this volume presents a guide to responsible implementation in Canada and abroad Offering unique insights into a debate on the bleeding edge of public discourse Transhumanizing War considers the best ways to improve combat effectiveness while still preserving soldiers humanity *It Was Sheridan's Fault Not Custer's: LTG Sheridan's Campaign Plans Against The Plain Indians* Major Hubert L. Stephens, 2014-08-15 Martin van Creveld a noted theorist contends that the concept of operational art did not take off in the U S until after the Vietnam War Conversely James Schneider a prominent military theorist asserts that operational art began in the American Civil War This monograph provides a holistic analysis of four Plains Indian War Campaigns Lieutenant General LTG Philip Sheridan conducted all four campaigns This analysis illustrates several enduring principles of both operational art and counterinsurgency COIN operations The purpose of the monograph is to explain the initial failure of LTG Sheridan s 1876 Centennial Campaign against the Sioux and Cheyenne Indians Additionally this explanation relates the significance of LTG Sheridan s planning to contemporary COIN campaign planning The overall methodology is the incorporation of four case studies to test the theory of sanctuary control and elimination of resources to defeat insurgencies The monograph contains three key findings The first

key finding is that the failure at the Little Big Horn was LTG Sheridan's fault not LTC Custer's and this directly relates to the second finding. The second key finding is the importance of operational art in designing a campaign plan to link tactical actions to strategic objectives. The third finding is the efficacy of some of the current COIN tenets. Ultimately this monograph demonstrates the utility of a strategy of exhaustion and its resulting operations to control terrain and insurgent sanctuaries as well as to deny the enemy resources to defeat an insurgency.

Unified Land Operations (ADP 3-0) Department Army, 2012-11-17. Army Doctrine Publication ADP 3-0 is one of the Army's two capstone doctrine publications; the other is Field Manual FM 1. The Army ADP 3-0 presents overarching doctrinal guidance and direction for conducting operations. It constitutes the Army's view of how it conducts prompt and sustained operations on land and sets the foundation for developing the other principles, tactics, techniques, and procedures detailed in subordinate doctrine publications. ADP 3-0 is the first manual published under Doctrine 2015 initiative. It provides operational guidance for commanders and trainers at all echelons and forms the basis for Army Education System curricula. The principal audience for ADP 3-0 is the middle and senior leadership of the Army: officers in the rank of major and above who command Army forces in major operations and campaigns or serve on the staffs that support those commanders. It is also applicable to the civilian leadership of the Army.

Army Doctrine Reference Publication ADRP 3-0 Operational October 2017 United States Government: US Army, 2017-10-09. This doctrine manual, Army Doctrine Reference Publication ADRP 3-0 Operational October 2017, supports land operations doctrine established in ADP 3-0 Operations and is supported by FM 3-0 Operations. This publication expands the overarching guidance on unified land operations. It accounts for the uncertainty of operations and recognizes that a military operation is a human undertaking. It constitutes the Army's view of how to conduct prompt and sustained operations on land and sets the foundation for developing other principles, tactics, techniques, and procedures detailed in subordinate doctrine publications. The principal audience for ADRP 3-0 is all members of the profession of arms. Commanders and staffs of Army headquarters serving as joint task force or multinational headquarters should also refer to applicable joint or multinational doctrine concerning the range of military operations and joint or multinational forces. Trainers and educators throughout the Army will use this publication as well. ADRP 3-0 contains numerous changes to the November 2016 version; the most significant of which are updates necessary to align with FM 3-0 Operations. ADRP 3-0 modifies the definition of unified land operations to account for the consolidation of gains. ADRP 3-0 adds the concept of a consolidation area to the operational framework. Additional changes include a discussion of peer threats, positions of relative advantage, multi-domain considerations, and the consolidation of gains as an Army strategic role. These all expand upon unified land operations. ADRP 3-0 employs information such as principles and tenets as a means of highlighting key aspects of doctrine. Where lists are employed, a narrative discussion follows to provide details on the subject. They serve as guidelines or tools for readers to more easily remember important doctrinal terms. However, there remains a need to study doctrine in detail and consider how terms are applied to

operations ADP 3-0 modifies key topics and updates terminology and concepts as necessary. These topics include the discussion of an operational environment and the operational and mission variables as well as discussions of unified action, law of land warfare, and combat power. Mission command remains both a philosophy of command and a warfighting function. ADP 3-0 contains five chapters. Chapter 1 discusses military operations. It describes the variables that shape the nature of an operational environment and affect outcomes. The chapter then discusses unified action and joint operations as well as land operations. Finally, this chapter discusses the importance of training to gain skill in land warfare. Chapter 2 discusses the application of operational art. It discusses how commanders should consider defeat and stability mechanisms when developing an operational approach. It then discusses the elements of operational art and their meanings to Army forces. Chapter 3 discusses the Army's operational concept of unified land operations. It discusses how commanders apply landpower as part of unified action to defeat the enemy on land and establish conditions that achieve the joint force commander's end state. Chapter 4 discusses the principles of unified land operations and the tenets of unified land operations. Chapter 5 discusses the operations structure commanders use to array forces and conduct operations. It includes a discussion on the addition of a consolidation area to the operational framework. It concludes with a discussion on the operational framework used in the conduct of unified land operations. Chapter 6 discusses combat power. It opens with a discussion of the elements of combat power. It then discusses the six warfighting functions used to generate combat power and access joint and multinational capabilities. Lastly, it discusses how Army forces organize combat power through force tailoring, task organization, and mutual support.

Transportation Study Guide Stanley Berge, 1940 *Unified Land Operations*
Department of the Army, 2011-10-10

When we published Change 1 to the 2008 edition of Field Manual FM 3-0, we captured the most critical lessons of almost ten years of sustained land combat. In this edition, we not only reflect on the past but also look to an uncertain future. Army Doctrine Publication ADP 3-0, *Unified Land Operations*, provides a common operational concept for a future in which Army forces must be prepared to operate across the range of military operations, integrating their actions with joint interagency and multinational partners as part of a larger effort. *Unified Land Operations* is a natural intellectual outgrowth of past capstone doctrine. *AirLand Battle* recognized the three-dimensional nature of modern warfare, while *Full Spectrum Operations* recognized the need to conduct a fluid mix of offensive, defensive, and stability operations simultaneously. This publication builds on both these ideas, adding that success requires fully integrating Army operations with the efforts of joint interagency and multinational partners. The central idea of *Unified Land Operations* is that Army units seize, retain, and exploit the initiative to gain and maintain a position of relative advantage in sustained land operations to create conditions for favorable conflict resolution. This central idea applies to all military operations: offensive, defensive, and stability; or defense support of civil authorities. This unifying principle connects the various tasks Army forces may perform. It adds the founding principles of flexibility, integration, lethality, adaptability, depth, and synchronization. It incorporates the

principle that operational art is the connection between strategic objectives and tactical actions and provides a common construct for organizing military operations The construct consists of the Army operations process an operations framework for visualizing and describing operations and the warfighting functions ADP 3 0 serves as the common operational concept for the Army The central idea adapted to the unique conditions of each conflict represents the Army s unique contribution to unified action It must permeate our doctrine our training and our leader professional development programs
