Jay, 2016-04-19 As headache and facial pain are two of the most common medical complaints it is essential that clinicians are well equipped to handle these issues Clinician's Guide to Chronic Headache and Facial Pain is designed for all clinicians dealing with these syndromes in daily practice whether in the outpatient emergency or ambulatory setting Features *Coping with Life Stress, volume II* Alexander V. Libin, Elena V. Libin, Walter Erich Penk, Nawar Shara, 2024-02-09 This Research Topic is the second volume of the Research Topic *Coping With Life Stress* Please see the first volume here Existing studies on coping with stress and life difficulties are very contradictory Traditional approaches while identifying cognitive emotional and behavioral aspects of coping often confuse the modality of the strategy with its functionality and outcome This conceptual drawback presents quite a few challenges to the study of efficient and inefficient strategies Perception of the incongruence between modalities cognitive

emotional or behavioral of a particular strategy and its functionality or organizational efforts efficient vs inefficient hinders the development of an integrated methodology for a generalized coping with life stress process The absence of general principles for classification of efficient and inefficient coping poses methodological as well as practical difficulties in their diagnostics and differentiation thereby causing additional obstacles in the systematic study of this important phenomenon The Coping with Life Stress approach is focused on research based on the translation of scientific knowledge regarding problem solving processes into practical applications geared toward improvement of individual life learning or coping skills

Handbook of Headache Paolo Martelletti, Timothy J. Steiner, 2011-08-14 Headache disorders are among the most common disorders of the nervous system They are pandemic and in many cases they are recurrent and can accompany the patient for the whole life These disorders impose a substantial burden on headache sufferers on their families and on society the individual impact is measured by the frequency and severity of attacks while the societal burden is measured in terms of loss of activity at work and school as well as of costs for the health system As a matter of facts headaches are ranked in the top ten and maybe the top five causes of disability worldwide they are therefore extraordinarily common Population based studies have mostly focused on migraine which even if it is the most frequently studied headache disorder is not the most common Other types of headache such as the more prevalent TTH and sub types of the more disabling chronic daily headache have so far received less attention and need to be better investigated This book will provide a useful tool to a wide medical population who is required specific skills to diagnose and manage these frequent and often disabling disorders Furthermore it could also represents a compendium for medical students who are usually introduced to this topic through multidisciplinary university programmes
