Advances in Web-Based Learning -- ICWL 2003 Wanlei Zhou,Paul Nicholson,Brian Corbitt,Joseph Fong,2003-09-09 nd The 2 International Conference on Web Based Learning ICWL 2003 took place in Melbourne Australia ICWL 2003 followed the

tradition of the successful ICWL 2002 held in Hong Kong and aimed at providing an in depth study of the technical and pedagogical issues as well as incorporating management issues of Web based learning. Additionally there was a focus on issues of interest to the learner offering the optimal Web based learning environment to achieve high academic results. The University organized this conference in conjunction with the Hong Kong WebSociety to provide a forum which gathered educators, researchers, technologists and implementers of Web based learning from around the world to discuss, collaborate and advance all relevant issues pertaining to this area of research. The main focus of ICWL 2003 was on the most critical areas of Web based learning in particular Web based learning environments, virtual universities, pedagogical issues related to Web based learning, multimedia based e learning, interactive e learning systems, intelligence in on line education, e learning solutions, CSCW and authoring tools for e learning. In total the conference received 118 papers from researchers and practitioners from 13 countries. Each paper was reviewed by at least three internationally renowned referees. Papers were rigorously examined and selected based on their originality, significance, correctness, relevance and clarity of presentation. Among the high quality submissions 50 papers were accepted and included in the proceedings. Later the proceedings editors will recommend that some high quality papers from the conference be published in a special issue of an international journal.

Foundations and Practice of Security Kamel Adi, Simon Bourdeau, Christel Durand, Valérie Viet Triem Tong, Alina Dulipovici, Yvon Kermarrec, Joaquin Garcia-Alfaro, 2025-04-30. This two volume set constitutes the refereed proceedings of the 17th International Symposium on Foundations and Practice of Security FPS 2024 held in Montréal, QC, Canada during December 09-11, 2024. The 28 full and 11 short papers presented in this book were carefully reviewed and selected from 75 submissions. The papers were organized in the following topical sections: Part I: Critical issues of protecting systems against digital threats considering financial, technological and operational implications; Automating and enhancing security mechanisms in software systems and data management; Cybersecurity and AI when applied to emerging technologies; Cybersecurity and Ethics; Cybersecurity and privacy in connected and autonomous systems for IoT, smart environments and critical infrastructure; New trends in advanced cryptographic protocols. Part II: Preserving privacy and maintaining trust for end users in a complex and numeric cyberspace; Intersecting security, privacy and machine learning techniques to detect, mitigate and prevent threats; New trends of machine learning and AI applied to cybersecurity.

Operating Systems Pranababandya Chakraborty, 2023-11-22. This text demystifies the subject of operating systems by using a simple step by step approach from fundamentals to modern concepts of traditional uniprocessor operating systems in addition to advanced operating systems on various multiple processor platforms and also real time operating systems (RTOSs). While giving insight into the generic operating systems of today, its primary objective is to integrate concepts, techniques and case studies into cohesive chapters that provide a reasonable balance between theoretical design issues and practical implementation details. It addresses most of the issues that need to be resolved in the design and development of continuously evolving rich

diversified modern operating systems and describes successful implementation approaches in the form of abstract models and algorithms This book is primarily intended for use in undergraduate courses in any discipline and also for a substantial portion of postgraduate courses that include the subject of operating systems It can also be used for self study Key Features Exhaustive discussions on traditional uniprocessor based generic operating systems with figures tables and also real life implementations of Windows UNIX Linux and to some extent Sun Solaris Separate chapter on security and protection a grand challenge in the domain of today s operating systems describing many different issues including implementation in modern operating systems like UNIX Linux and Windows Separate chapter on advanced operating systems detailing major design issues and salient features of multiple processor based operating systems including distributed operating systems Cluster architecture a low cost base substitute for true distributed systems is explained including its classification merits and drawbacks Separate chapter on real time operating systems containing fundamental topics useful concepts and major issues as well as a few different types of real life implementations Online Support Material is provided to negotiate acute page constraint which is exclusively a part and parcel of the text delivered in this book containing the chapter wise topic wise detail explanation with representative figures of many important areas for the completeness of the narratives
