papers by leading philosophers and historians of early modern thought opens up these questions exploring them in new and markedly interdisciplinary ways offering fresh insights into the important relationship between Descartes and the Modern and the very meaning and status of Modernity itself This collection assembles together for the first time leading representatives from what might be called the naturalist or Anglo American school with those of the continental phenomenological school in a dialogue concerning Descartes place The papers explore crucial questions and recent disputes regarding Descartes relationship to his predecessors to his contemporaries and to modern thought to the philosophy of mind to questions of metaphysics and natural philosophy Descartes and the Modern helps bridge solitudes drawn between these traditional approaches to Descartes
