The Beginnings of Christianity Howard Clark Kee, 2005-11-22 To understand the historical beginnings of Christianity requires one not only to examine the documents that the movement produced but also to scrutinize other evidence historical literary and archaeological that can illumine the socio cultural context in which Christianity began and how it responded to the influences that derived from that setting. This involves not only analysis of the readily accessible content of the relevant literary evidence but also attention to the world views and assumptions about reality that are inherent in these documents and other phenomena that have survived from this period. Attention to the roles of leadership and the modes of formation of social identity in Judaism and the continuing influence of these developments as Christianity began to take shape is important for historical analysis. Distinguished New Testament scholar Kee performs such readings of the texts and communities in this dazzling study of early Christian origins. In methodological terms the historical study of Christian Origins in all its diversity must involve three different modes of analysis 1 epistemological 2 sociological and 3 eschatological. The first concerns the way in which knowledge and communication of it were perceived. The second seeks to discern the way in which the community or tradition preserving and conveying this information defined its group identity and its shared values and aims. The third focuses on the way in which the group understood and affirmed its ultimate destiny and that of its members in the purpose of God. These factors are interrelated and features of one mode of perception strongly influence details of the others but it is useful to consider each of them in its own category in order to discern with greater precision the specific historical features of the spectrum of facets which appear in the evidence that has survived concerning the origins of Christianity.

The Making of the New Testament Arthur G. Patzia, 2025-08-28 The story of the making of the New Testament is one in which scrolls bumped across cobbled Roman roads and pitched through rolling Mediterranean seas finally finding their destinations in stuffy dimly lit Christian house churches in Corinth or Colossae. There they were read aloud and reread handled and copied forwarded and collected studied and treasured. And eventually they were brought together to make up our New Testament. This revised and expanded edition of *The Making of the New Testament* is a textbook introduction to the origin collection copying and canonizing of the New Testament documents. Like shrewd detectives reading subtle whispers of evidence biblical scholars have studied the trail of clues and pieced together the story of these books. Arthur Patzia tells the story answering our many questions. How were books and documents produced in the first century? What motivated the early Christians to commit teaching and narrative and vision to papyrus? How were the stories and sayings of Jesus circulated handed down and shaped into Gospels? What do we know about ancient letter writing secretaries and copy shops? Why were four Gospels included instead of just one? How were Paul's letters sent here and there gathered into a single collection? Who decided and by what criteria which documents would be included in the New Testament? Explore these questions and more about these Scriptures whose everyday gritty story rings true to their
