comprehensive analysis of ongoing developments such as the impact of new members on the incumbent TPP 12 and its spillover to third parties as well an objective study of the crucial issues of liberalization of agriculture pharmaceuticals and intellectual property rights Intellectual Property and Free Trade Agreements in the Asia-Pacific Region Christoph Antons, Reto M. Hilty, 2014-12-05 This book is highly topical The shift from the multilateral WTO negotiations to bilateral and regional Free Trade Agreements has been going on for some time but it is bound to accelerate after the WTO Doha round of negotiations is now widely regarded as a failure However there is a particular regional angle to this topic as well After concluding that further progress in the Doha round was unlikely Pacific Rim nations recently have progressed with the negotiations of a greatly expanded Trans Pacific Partnership Agreement that includes industrialised economies and developed countries such as the United States Japan Australia and New Zealand recently emerged economies such as Singapore but also several developing countries in Asia and Latin America such as Malaysia and Vietnam US and EU led efforts to conclude FTAs with Asia Pacific nations are also bound to accelerate again after a temporary slowdown in the negotiations following the change of government in the United States and the expiry of the US President's fast track negotiation authority The book will provide an assessment of these dynamics in the world's fastest growing region It will look at the IP chapters from a legal perspective but also put the developments into a socio economic and political context Many agreements in fact are concluded because of this context rather than for purely economic reasons or to achieve progress in fields like IP law The structure of the book follows an outline that groups countries into interest alliances according to their respective IP priorities This ranges from the driving forces of the EU US and Japan via Asia Pacific resource rich but IP poor economies such as Australia and New Zealand recently emerged economies with strong IP systems such as Singapore and Korea to leading developing countries such as China and India and second tier industrializing economies such as Thailand Malaysia and Indonesia *The Political Economy of New Regionalisms in the Pacific Rim* José Briceño-Ruiz, Philippe De Lombaerde, 2019-08-28 Combining an analysis of regionalism from a systemic view with a domestic political economy analysis this book sheds light on the new dynamics and emerging configurations of regionalisms and interregionalisms in the post Trans Pacific Partnership TPP Donald Trump's presidency has transformed trans Pacific economic and political relations contrasting sharply with President Obama's pivot to Asia strategy Unilateralism and bilateralism have returned to the center stage at the cost of regionalism interregionalism and multilateralism Understanding these new dynamics requires closer examination of the underlying domestic political economies Examining ten country case studies of multi actor agency at the national level expert contributors argue that trans Pacific relations should not only be explained in terms of the behavior of the major powers but that medium powers and even small countries can exert influence and occupy strategic nodes and contribute to shaping a new international relations network Their findings will be of interest to scholars of international relations international political economy regionalism and international economics The Cambridge Handbook of
