The Turn to Infrastructure in Internet Governance Francesca Musiani, Derrick L. Cogburn, Laura DeNardis, Nanette S. Levinson, 2016-03-02 This edited volume brings together experts from around the world to provide coverage and analysis of infrastructure's role in Internet governance both now and in the future. Never in history have conflicts over Internet governance attracted such widespread attention. High profile controversies include the disclosures about NSA surveillance by intelligence analyst Edward Snowden, controversy over a decision by the US government to relinquish its historic oversight of Internet names and numbers, and countless cybersecurity breaches involving unauthorized access to Internet users' personal data. Much of the Internet governance ecosystem, both technical architecture and coordinating institutions, is behind the scenes but increasingly carries significant public interest implications. An area once concealed in institutional and technological complexity is now rightly bracketed among other shared global issues such as environmental protection and human rights that have considerable global implications but are simply incongruous with national borders. This transformation into an era of global governance by Internet infrastructure presents a moment of opportunity for scholars to bring these politicized infrastructures to the foreground.

The Business of Filmmaking Maria Johnsen, 2023-03-13 The business of filmmaking is a multifaceted and intricate industry that encompasses various aspects such as production, distribution, and marketing. Success in this field requires a combination of talent, creativity, and business acumen. Filmmakers must possess a thorough understanding of the market, identifying trends and opportunities to capitalize on. Additionally, they must adeptly manage budgets, negotiate deals, and foster relationships with investors, distributors, and other industry stakeholders. Recent years have witnessed significant transformations in the film industry due to advancements in artificial intelligence (AI) technology and the surge of streaming services. While traditional movie theaters retain their importance, an increasing number of viewers now prefer online or mobile platforms for film consumption.

Consequently filmmakers must adapt to these evolving trends and find innovative ways to engage with audiences My goal in writing this book is to raise awareness about film marketing processes and the art of building a business and network within the film industry Unfortunately colleges and universities often neglect these critical aspects with the majority of lectures and programs focusing solely on the technicalities of filmmaking Merely obtaining a master s degree in film production is insufficient for success in this field To thrive in filmmaking like any other business one must cultivate relationships with various stakeholders ranging from cast and crew to sales agents distributors exhibitors lawyers and publicists This book is not another typical guide to filmmaking Instead I delve into the essential elements of building a successful business in the movie industry emphasizing the impact of artificial intelligence on different aspects of the filmmaking process Furthermore I discuss strategies for increasing the value of one s film such as hiring A list actors for low budget projects and more
