*Unexpected State* Carly Beckerman, 2020-03-03 Cutting through assumptions about Britain s support for a national home for the Jewish people in the creation of British Palestine Carly Beckerman explores why and how elite political battles in London inadvertently laid the foundations for the establishment of the State of Israel Drawing on foreign policy analysis and previously unused archival sources *Unexpected State* considers the strategic interests the high stakes

international diplomacy and the tangle of political maneuvering in Westminster that determined the future of Palestine. Contrary to established literature, Beckerman argues that British policy toward the territory was dominated by seemingly unrelated domestic and international political battles that left little room for considerations of Zionist or Palestinian interests and arguments. Beckerman instead shows how the policy process was aimed at resolving issues such as coalition feuds, party leadership battles, spending cuts, and riots in India. Considering detailed analysis of four major policy-making episodes between 1920 and 1948, *Unexpected State* interrogates key Israeli and Palestinian narratives and provides fresh insight into the motives and decisions behind policies that would have global implications for decades to come. *Advances and Challenges of RNAi Based Technologies for Plants - Volume 2* Bruno Mezzetti, Jeremy Bruton Sweet, Guy Smagghe, Elena Baraldi, Salvatore Arpaia, Antje Dietz-Pfeilstetter, Vera Ventura, 2022-08-04. Reducing the Burden of Injury Committee on Injury Prevention and Control, Institute of Medicine, 1999-01-04. Injuries are the leading cause of death and disability among people under age 35 in the United States. Despite great strides in injury prevention over the decades, injuries result in 150,000 deaths, 26 million hospitalizations, and 36 million visits to the emergency room each year. *Reducing the Burden of Injury* describes the cost and magnitude of the injury problem in America and looks critically at the current response by the public and private sectors, including data and surveillance needs, research priorities, trauma care systems development, infrastructure support, including training for injury professionals, firearm safety, coordination among federal agencies. The authors define the field of injury and establish boundaries for the field regarding intentional injuries. This book highlights the crosscutting nature of the injury field, identifies opportunities to leverage resources and expertise of the numerous parties involved, and discusses issues regarding leadership at the federal level. **Governing Lethal Behavior in Autonomous Robots** Ronald Arkin, 2009-05-27. Expounding on the results of the author's work with the US Army Research Office-DARPA, the Office of Naval Research, and various defense industry contractors, *Governing Lethal Behavior in Autonomous Robots* explores how to produce an artificial conscience in a new class of robots: humanoid robots that can potentially perform more effectively. **Sudden Unexpected Death in Epilepsy: Bio-markers, Mechanisms, Risk Identification and Prevention** Christopher Michael DeGiorgio, Rainer Surges, Michael R. Sperling, 2020-01-28. **Advances in Investment Analysis and Portfolio Management (New Series) Vol. 10** Cheng F. Lee, 2020-12-01. *Advances in Investment Analysis and Portfolio Management* New Series is an annual publication designed to disseminate developments in the area of investment analysis and portfolio management. The publication is a forum for statistical and quantitative analyses of issues in security analysis, portfolio management, options, futures, and other related issues. The objective is to promote interaction between academic research in finance, economics, and accounting and applied research in the financial community. Theory and Research in Educational Administration Vol. 1 Cecil Miskel, Wayne K. Hoy, 2002-03-01. This series is dedicated to advancing our understanding of schools through empirical study and theoretical analysis. Scholars both young and established are

invited to publish original analyses but we especially encourage young scholars to contribute to Theory and Research in Educational Administration This first issue provides a mix of beginning and established scholars and a range of theoretical perspectives Eight separate but related studies were selected for this first issue Three of the research pieces deal with the intended and unintended consequences of policy and political initiatives in schools Do high stakes accountability environments threaten the potential of learning organizations Marks and Printy grapple with that question Not surprisingly they anticipate the latent dysfunctional consequences of high stakes accountability as they provide a careful analysis of urban school district responses to state policies Well intended initiatives produced unintended consequences that threatened the capacity for organizational learning in these schools In a similar fashion Jones and Malen s findings suggest that political strategies that use insider dynamics can foster successful enactment of reforms but often at a cost of undermining efforts to implement the policy Song and Miskel focus their analysis on national reading policy An examination of national interests groups and policymakers suggests that an assessment of various groups influence is necessary if policy actors are to make sensible judgments in choosing allies and building coalitions for effective actions Two of the papers are informed by contingency theory Ogawa and Studer are concerned with the relationship between the school and its community They propose that both buffering and bridging strategies enable schools to deal with parents effectively Because schools depend on parents for resources they bridge to parents in cooperative fashion but because parents often pose uncertainty schools also buffer parent influence by limiting their access Yet there is divergence from contingency theory because schools depend primarily on parents to provide socio cultural rather than material resources hence schools often use strategies that shape rather than diminish dependence on parents Rowan also draws ideas from contingency theory to examine the extent to which the nature of teachers instructional work affects patterns of instructional management in schools His data support the explanation that teachers who face increased task variety actively work to construct organic patterns of instructional management to reduce task uncertainty and to increase workplace motivation and commitment Three papers examine teachers in schools Rowan is intrigued by the variation in the nature of teachers work both in terms of task variety and task uncertainty He finds that teachers do not see their work as many organizational theorists do that is as a non routine form of work in fact teachers view teaching as either as a routine task or expert task In spite of the fact that many teachers endorsed a constructivist view of teaching few concluded it was a non routine task Moreover teachers in different disciplines have different views about both the nature of academic knowledge and desirable teaching practices Both Goddard and Hoy and his colleagues use social cognitive theory to develop an argument of the importance of collective efficacy in positively influencing student achievement Hoy Smith and Sweetland build on their earlier work to demonstrate that collective efficacy of schools is pivotal in explaining student achievement in a sample of rural schools Goddard shows that that collective efficacy is also an important predictor of the practice of involving teachers in important school decisions He concludes that the more we learn

how school practices are related to collective efficacy the more we will know about what school leaders

**Sectarianism in Iraq** Khalil Osman, 2014-10-10 This book links sectarianism in Iraq to the failure of the modern nation state to resolve tensions between sectarian identities and concepts of unified statehood and uniform citizenry After a theoretical excursus that recasts the notion of primordial identity as a socially constructed reality the author sets out to explain the persistence of sectarian affiliations in Iraq since its creation following the dismemberment of the Ottoman Empire Despite the adoption of homogenizing state policies the uneven sectarian composition of the ruling elites nurtured feelings of political exclusion among marginalized sectarian groups the Shicites before 2003 and the Sunnis in the post 2003 period The book then examines how communal discourses in the educational curriculum provoked masked forms of resistance that sharpened sectarian consciousness Tracing how the anti Persian streak in the nation state s Pan Arab ideology which camouflaged anti Shicism undermined Iraq s national integration project Sectarianism in Iraq delves into the country s slide from a totalizing Pan Arab ideology in the pre 2003 period toward the atomistic impulse of the federalist debate in the post 2003 period Employing extensive fieldwork this book sheds light on the dynamics of political life in post Saddam Iraq and is essential reading for Iraqi and Middle East specialists as well as those interested in understanding the current heightening of sectarian Sunni Shicite tensions in the Middle East
