

Food Inc Movie Sheet

The modern American supermarket has, on average 47,000 products.

The reality behind how our food is produced is not a farm, but a factory

In the 1930's the drive in was invented by the McDonald brothers.

We have never had food companies this big, and this powerful in our histories.

To build one poultry house costs between 280,000 and 400,000.

A typical grower (not farmer) with two chicken houses has borrowed over 500,000 and earned 13,000.

A Cornucopia:

Most of our industrial food base is made from corn.

CAFO stands for concentrated animal feeding operations.

Unintended Consequences: Regulatory agencies are being controlled by the companies they are supposed to be scrutinizing.

There are 13 slaughter houses in the USA that process the majority of the beef.

Kevin's Law would give the USDA the power to shut down processing plants that repeatedly produce contaminated beef.

Beef filler is washed in ammonia to kill e-coli bacteria.

The Dollar Menu:

The biggest determinant of obesity is income money.

One third of all Americans born after 2000 will contract early onset diabetes

In The Grass:

The people who own the processing plants don't want others to go there because then the world would see the ugly truth
