Handbook of Open Universities Around the World Sanjaya Mishra, Santosh Panda, 2025-06-27 The Handbook of Open

Universities Around the World is the first collection to provide a comprehensive and critical overview of open universities internationally. Over 80 open universities have been established across five continents to provide a distance orientated class inclusive and high quality education for learners left behind by existing formal systems for higher and continuing education and lifelong learning. This mission has been continually reshaped by major developments in open education learning technologies and online social networking as well as by the evolution of specific concerns such as the massification of education, employability, financial trends, artificial intelligence and development agendas on the regional, national and global levels. This landmark volume analyzes and reflects on the planning, organization, management, pedagogic, skilling and employability and accreditation dimensions of 47 open universities in relation to their national and institutional contexts, the internationalization of education and the integration of advanced learning technologies. Featuring contributions by internationally recognized scholars, practitioners and educational administrators, this authoritative resource provides insights into the business model, finances, operations, instructional systems, enrollment patterns, learner supports, quality assurance, professional development and more of today's open universities. Through historical trajectories, institutional profiles, case studies, lessons learned and best practices, this book provides rich analytical perspectives on the status and challenges of single mode distance learning universities as an educational phenomenon while unpacking the premise of openness itself. This Handbook is primarily written for planners, managers, administrators, instructional designers and teaching faculty at single mode distance teaching universities who are seeking to sustain their institutions in a period of rapid change, government policymakers, training organizations, technology providers and education think tanks who are in need of authentic and research based information on technology enabled learning modeled by open universities around the world and graduate students, teaching faculty and scholars who are affiliated with online and distance education, learning design and technology, higher education planning and management, adult education and lifelong learning and education policy and future studies. Chapter 54 of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license. Landscapes between Then and Now Nicola Brandt, 2020-09-08 In Landscapes Between Then and Now Nicola Brandt examines the increasingly compelling and diverse cross disciplinary work of photographers and artists made during the transition from apartheid to post apartheid and into the contemporary era By examining specific artworks made in South Africa Namibia and Angola Brandt sheds light on established and emerging themes related to aftermath landscapes embodied histories un belonging spirituality and memorialization She shows how landscape and identity are mutually constituted and profiles this process against the background of the legacy of the acutely racially divisive policies of the apartheid regime that are still reflected on the land As a signpost throughout the book Brandt draws on the work of the renowned South African photographer Santu Mofokeng and his critical thinking about landscape Landscapes Between Then and Now explores how practitioners who engage with identity and their physical environment as a

social product might reveal something about the complex and fractured nature of postcolonial and contemporary societies. Through diverse strategies and aesthetics they comment on inherent structures and epistemologies of power whilst also expressing new and radical forms of self-determinism. Brandt asks why these cross-disciplinary works ranging from social documentary to experimental performance and embodied practices are critical now and what important possibilities for social and political reflection and engagement they suggest.
