Mark Pegrum, Nicky Hockly, Gavin Dudeney, 2014-06-03 Dramatic shifts in our communication landscape have made it crucial for language teaching to go beyond print literacy and encompass the digital literacies which are increasingly central to learners' personal, social, educational and professional lives. By situating these digital literacies within a clear theoretical framework, this book provides educators and students alike with not just the background for a deeper understanding of these key 21st century skills but also the rationale for integrating these skills into classroom practice. This is the first methodology book to address not just why but also how to teach digital literacies in the English language classroom. This book provides a theoretical framework through which to categorise and prioritise digital literacies. Practical classroom activities to help learners and teachers develop digital literacies in tandem with key language skills. A thorough analysis of the pedagogical implications of developing digital literacies in teaching practice. A consideration of exactly how to integrate digital literacies into the English language syllabus. Suggestions for teachers on how to continue their own professional development through PLNs (Personal Learning Networks) and how to access teacher development opportunities online. This book is ideal for English language teachers and learners of all age groups and levels, academics and students researching digital literacies and anyone looking to expand their understanding of digital literacies within a teaching framework. *Advanced Research on Electronic Commerce, Web Application, and Communication* Gang Shen, Xiong Huang, 2011-04-04 The two volume set CCIS 143 and CCIS 144 constitutes the refereed proceedings of the International Conference on Electronic Commerce Web Application and Communication ECWAC 2011 held in Guangzhou, China, in April 2011.
