July-September 2005 United Nations,2006-12 The United Nations Documents Index provides information on documents and publications issued by United Nations offices worldwide The information is presented in nine sections covering the areas of documents and publications official records sales publications United Nations maps included in UN documents United Nations sheet maps United Nations document series symbols author index title index and subject index The index is a two part set Publishing Agency United Nations UN U.S. Military Detention Operations in Post-Abu Ghraib Iraq Jeffrey Meriwether,2018-02-22 Detention operations are vital to U S military doctrine and crucial to the success of combat and recovery missions This book shows that the image of abuse from Abu Ghraib were but one small harmful element in an overwhelmingly successful detention mission in Iraq It focuses on the subsequent developments and successes explaining the standard rule of law approach taken by the U S military and examining the work in Iraq of such leaders as Major General

John D Gardner and Major General Douglas M Stone Overall the text moves away from the Abu Ghraib scandal to illuminate a largely unknown successful development in the U S detention operations Following the Abu Ghraib scandal of 2003 2004 the U S Department of Defense scrambled to recover its reputation and that of its troops As the Bush Administration sought to redefine torture military judge advocates consistently challenged such moves arguing in favor of the Geneva Conventions humanitarian practices By 2006 Department of Defense policy stipulated full respect for and use of the Geneva Conventions This development was indeed a victory for American support for rule of law in Iraq as well as an affirmation of standard practices in the detention command Task Force 134 Pressures of war however continued to present their own challenges

Human Trafficking, Human Security, and the Balkans H. Richard Friman, Simon Reich, 2010-06-15 In the aftermath of four Yugoslav wars ongoing efforts at reconstruction in South Eastern Europe have devoted relatively limited attention to dimensions of human security that enhance protections for the region's most vulnerable populations in their daily lives It is in this context that South Eastern Europe and especially the Western Balkan region has emerged as a nexus point in human trafficking Human Trafficking Human Security and the Balkans brings together leading scholars NGO representatives and government officials to analyze and offer solutions to this challenge The contributors explore the economic dynamics of human trafficking in an era of globalization which has greatly facilitated not only the flow of goods and services but also the trade in human beings They also examine the effectiveness of international and transnational policies and practice the impact of peacekeeping forces and the emergence of national and regional action plans in the Western Balkans and more broadly in South Eastern Europe Finally they consider the nature and ramifications of the gap between human security rhetoric and institutional policy steps against human trafficking

American Torture Michael Otterman,2007-01-01 Contrary to US government assertions the Abu Ghraib photos do not reflect the perverse handiwork of a few bad apples As American Torture reveals tortures such as sensory deprivation sexual humiliation and forced standing are core elements of the American detention regime a product of more than sixty years of government research and development fully detailed in extensive CIA manuals In the wake of the Abu Ghraib scandal mainstream media and human rights organisations have exhaustively documented the American use of torture in detention centres around the world Although expansive these reports lack context American Torture examines the origins of this detention regime and traces how it was refined spread and kept legal Along the way American Torture uncovers the effects of state sponsored torture and deconstructs the myths espoused by its proponents What are the ramifications of such praxis for global security The book will also feature an interview with Mamdouh Habib and look at the plight of Guantanamo Bay detainee David Hicks

Winning the Un-war Charles V. Peña,2007 According to President Bush the American people are safer as a result of invading Iraq True Saddam Hussein has been removed from power But al Qaeda the group that planned and carried out the attacks on September 11 remains at large Meanwhile the White House has conceded that Saddam Hussein had nothing to do with the attacks Charles Peña argues that the war in Iraq is but one misstep in the Bush administration's global war on terror Terrorism is simply a tactic however not an enemy Trying to eradicate it is a quixotic quest that does not focus on those responsible for 9 11 Instead the national security strategy should consist of three central elements establishing homeland security against further attacks dismantling the al Qaeda terrorist network and enacting a foreign policy that does not attract new al Qaeda terrorists This approach requires restructuring U S forces and ending Cold War era commitments that distract from the current pressing threat It also requires ameliorating the negative consequences of an interventionist U S foreign policy which creates incentives and opportunities for terrorists to target the United States If we misdiagnose al Qaeda's motivations or focus military efforts on the wrong targets then we run the risk that the war against the al Qaeda terrorist threat and the radical Islamic ideology it represents will become a broader war against the Islamic world that could last generations and cost countless lives With a foreword by Michael Scheuer the bestselling author of Imperial Hubris

Basic Documents on International Investment Protection Martins Paparinskis,2012-07-09 The increase in the number and complexity of investor State treaty arbitrations in the last decade has attracted considerable attention from practitioners and academics of international investment protection law Rules aimed at regulating the protection of foreign investment have been expressed in a decentralised manner making a clear and comprehensive overview of the topic important This volume focuses on the relevant documents and aims to provide an exhaustive treatment of relevant procedural and substantive issues It includes

documents explaining the historical development of investment law substantive investment rules multilateral and bilateral treaties and model documents and general rules on the law of treaties and responsibility and procedural investment rules relating to the arbitral process in different fora immunity recognition and enforcement The book is aimed at teachers students and practitioners in the area It can be used both as a practitioners handbook and as a classroom companion for courses on international dispute settlement and investment protection law This title is included in Bloomsbury Professional s International Arbitration online service

The Opening Statement of the Prosecution in International Criminal Trials Sofia Stolk, 2021-04-20 This book addresses the discursive importance of the prosecution s opening statement before an international criminal tribunal Opening statements are considered to be largely irrelevant to the official legal proceedings but are simultaneously deployed to frame important historical events They are widely cited in international media as well as academic texts yet have been ignored by legal scholars as objects of study in their own right This book aims to remedy this neglect by analysing the narrative that is articulated in the opening statements of different prosecutors at different tribunals in different times It takes an interdisciplinary approach and looks at the meaning of the opening narrative beyond its function in the legal process in a strict sense discussing the ways in which the trial is situated in time and space and how it portrays the main characters It shows how perpetrators and victims places and histories are juridified in a narrative that whilst purporting to legitimise the trial the tribunal and international criminal law itself is beset with tensions and contradictions Providing an original perspective on the operation of international criminal law this book will be of considerable interest to those working in this area as well as those with relevant interests in International Transnational Law more generally Critical Legal Studies Law and Literature Socio Legal Studies Law and Geography and International Relations

Protecting the Religious Freedom of New Minorities in International Law Fabienne Bretscher, 2019-09-19 This book examines the interpretation and application of the right to freedom of religion and belief of new minorities formed by recent migration by the European Court of Human Rights ECtHR and the United Nations Human Rights Committee HRC New minorities are increasingly confronted with restrictions of their religious practices and have addressed their rights claims both to the ECtHR and the HRC through their individual complaint procedures which resulted in several contradicting decisions Based on a quantitative and qualitative empirical analysis of the relevant case law focusing in particular on the reasoning adopted by the two bodies this book finds that the HRC in its practice offers a significantly higher level of protection to new minorities than the ECtHR Such divergence may be explained by various institutional and conceptual differences of which the concept of the margin of appreciation is the most influential It is contended that the extensive use of the concept of the margin of appreciation by the ECtHR in the case law regarding new minorities right to freedom of religion and belief and the absence of such concept in the HRC s case law could be explained by different understandings of the role of an international human rights body in conflicts between the majority and minorities This book argues that such divergence could be mitigated with

various tools such as the inclusion of cross references to the case law of other relevant bodies as well as to instruments specifically established for the protection of minorities The book will be of interest to academics researchers and practitioners in the area of international human rights law international public law in general and law and religion

The Imperial Presidency and the Consequences of 9/11 Mark R. Shulman, James R. Silkenat, 2007-02-19 The issue of the imperial presidency which is raised in connection with the Bush administration's response to the legal issues flowing from the 9/11 attacks is one that now resonates broadly across the American political landscape not just with Democrats but with Republicans too and not just with lawyers but with the American public generally Are the legal powers of the President unlimited in cases of terrorist attacks on the United States Do the courts and legislatures have a role to play How relevant is the U.S. Constitution in these instances These reports compiled by the NYC Bar Association merit wider distribution Thus Silkenat and Shulman have brought them together to give readers a clearer sense of what the rule of law really means to Americans As noted in a New York Times editorial in January 2006 Nothing in the national consensus to combat terrorism after 9/11 envisioned the unilateral rewriting of more than 200 years of tradition and law by the president embarked on an ideological crusade Over the past few years much lip service has been paid to the phrase rule of law At the same time the U.S. government has avoided basic rule of law principles by holding prisoners outside the law off the books and out of Red Cross supervision off shore or even on U.S. soil but without due process or urgent matter that bears on the security of this country In both volumes learned practitioners and scholars argue in favor of adherence to time tested principles Each report has a preface that places the material in historical and legal context

Hitting First William W. Keller, Gordon R. Mitchell, 2006-09-03 The U S war in Iraq was not only an intelligence failure it was a failure in democratic discourse Hitting First offers a critical analysis of the political dialogue leading up to the American embrace of preventive war as national policy and as the rationale for the invasion and occupation of Iraq Taking as its point of departure the important distinction between preemptive and preventive war the contributors examine how the rhetoric of policy makers conflated these two very different concepts until the public could no longer effectively distinguish between a war of necessity and a war of choice Although the book focuses on recent events Hitting First takes into consideration the broader historical ethical and legal context of current American policies Precedents are examined for preventive military action based on conventional as well as nuclear biological and chemical weapons threats The authors also consider recent examples of the rhetoric of humanitarian intervention which have tended to undermine traditional notions of national sovereignty making purportedly morally justifiable actions easier to entertain Intelligence gathering and its use manipulation and distortion to suit policy agendas are also analyzed as are the realities of the application of military force military requirements to sustain a policy of preventive war and post conflict reconstruction Hitting First presents a timely and essential view of the lessons learned from the failures of the Iraqi conflict and offers a framework for avoiding future policy breakdowns through a process of deliberative public and governmental debate within a free market of ideas The critiques and prescriptions offered here provide a unique and valuable perspective on the challenges of formulating and conduct of national security policy while sustaining the principles and institutions of American democracy This collection will appeal to students and scholars of American foreign policy international relations political communication and ethics *The United Nations Principles to Combat Impunity: A Commentary* Frank Haldemann, Thomas Unger, 2018-03-21 The fight against impunity has become a growing concern of the international community Updated in 2005 the UN Set of Principles for the

Protection and Promotion of Human Rights Through Action to Combat Impunity is the fruit of several years of study developed under the aegis of the UN Commission on Human Rights and then affirmed by the Human Rights Council. These Principles are today widely accepted as constituting an authoritative reference point for efforts in the fight against impunity for gross human rights abuses and serious violations of international humanitarian law. As a comprehensive attempt to codify universal accountability norms, the UN Set of Principles marks a significant step forward in the debate on the obligation of states to combat impunity in its various forms. Bringing together leading experts in the field, this volume provides comprehensive academic commentary of the 38 principles. The book is a perfect companion to the document setting out the text of the Principles alongside detailed analysis as well as a full introduction and a guide to the relevant literature and case law. The commentary advances debates and clarifies complex legal issues, making it an essential resource for legal academics, students, and practitioners working in fields such as human rights, international criminal law, and transitional justice.

Changing Sustainability Norms through Communication Processes Karin Buhmann, 2017-12-29. This book traces the development of the Business Human Rights (BHR) regime that has so far culminated with the United Nations Guiding Principles on Business and Human Rights. It first surveys the argumentation and negotiation strategies that led to agreement on key elements of the BHR regime despite a range of conflicting interests across stakeholders from public, private, and not-for-profit organisations. It then maps out pro-active regulatory strategies and public-private regulation for promoting responsible business conduct, offering insights for civil society, public regulators, business managers, academics, and others. The book will assist engaged parties in structuring their arguments within negotiation processes with a view to enhancing their influence on change in business organisations in support of sustainability and new norms of conduct.
