Univ Of California Press:

The University of California Press Albert Muto, 1993-04-05 In 1893 when the University of California was just twenty five years old its governing board took a bold step in voting the money to set up a publishing program for the works of its faculty Like many of the American universities established in the late nineteenth century California followed the German model of emphasizing original research among its faculty But then as now commercial publishers were not prepared to publish the results and so these early research universities began to publish for themselves In the final quarter of the nineteenth century Johns Hopkins California Chicago and Columbia all began to publish All four in time became scholarly publishers of consequence In this book published to commemorate the centennial of the University of California Press Albert Muto chronicles the early history of the Press from its beginnings as a printer of monographs by the University's own faculty to its emergence in the early 1950s as a full fledged university press in the Oxbridge tradition Profusely illustrated with archival photos and examples of early book design this book gives us a new perspective on the history of publishing in the United States and on the early years of the nation's largest public university

The University of California Press, 1893-1933 Albert Muto, 1977 **Anthropologica**, 2006 **Clark Kerr's University of California** Cristina Gonzalez, 2017-07-28 This volume provides an intellectual history of Kerr's vision of the multiversity as expressed in his most famous work *The Uses of the University* and in his greatest administrative accomplishment the California Master Plan for Higher Education Building upon Kerr's use of the visionary hedgehog shrewd fox dichotomy the book explains the rise of the University of California as due to the articulation and implementation of the hedgehog concept of systemic excellence that underpins the master plan Arguing that the university's recent problems flow from a fox culture characterized by a free for all approach to management including excessive executive compensation this is a call for a new vision for the university and for public higher education in general In particular it advocates re funding and re democratizing public higher education and renewing its leadership through thoughtful succession planning with a special emphasis on diversity Gonzalez's work follows the ups and downs of women and minorities in higher education showing that university advances often have resulted in the further marginalization of these groups Clark Kerr's University of California is about American public higher education at the crossroads and will be of interest to those concerned with the future of the public university as an institution as well as those interested in issues relating to leadership diversity and succession planning
