Butler, 2024-08-19 *Universal Human Rights in Theory and Practice* Jack Donnelly, 2013-04-12 In the third edition of his classic work revised extensively and updated to include recent developments on the international scene Jack Donnelly explains and defends a richly interdisciplinary account of human rights as universal rights He shows that any conception of human rights and the idea of human rights itself is historically specific and contingent Since publication of the first edition in 1989 *Universal Human Rights in Theory and Practice* has justified Donnelly's claim that conceptual clarity the fruit of sound theory can facilitate action At the very least it can help to unmask the arguments of dictators and their allies **The Oxford Handbook of International Law and Development**, 2023-11-11 Since the mid twentieth century international law and international development have become two of the most prominent secular languages through which aspirations about a better world are articulated They have shaped the both the treatment and self understanding of the developing world often by positing the West as a universal model against which developing states their citizens and natural environments should be measured and disciplined In recent years however critical scholars have investigated the deep linkages between the concept of development the doctrines and institutions of international law and broader projects of ordering at the international level They have shown how the leading models de radicalise if not derail initiatives to redefine development and pursue other forms of global well being Bringing together scholars from both the Global South and the Global North the contributions in this Handbook invite readers to consider the limits of common normative and developmentalist assumptions At the same time the Handbook demonstrates how disparate but still identifiable set of ideas imaginaries norms and institutional practices related to law development and international governance shape today's profoundly unequal material conditions threatening the future of human and nonhuman life on the planet The book focuses on five distinct areas existing disciplinary frameworks institutions and actors regional theatres of international law and development competing social and economic agendas and alternative futures Offering a unique overview of the field of international law and development and assembling major critical historical and political economic insights this Handbook is an unmissable resource for scholars of international law international relations development studies and global history as well as anyone interested in the past present and future of our world Human Rights in the World Community Richard Pierre Claude, Burns H. Weston, 2006-10-04 This unique textbook seeks to promote students critical and analytical skills and to provide a teacher friendly resource featuring in depth scholarly introductions to each chapter multiple questions for discussion and reflection and an extensive bibliography and annotated filmography A History of Science in Society Andrew Ede, Lesley B. Cormack, 2012-01-01 This bestselling book traces the history of science through its continually changing place in society and explores the links between the pursuit of knowledge and the desire to

make that knowledge useful **Global Humanitarianism** Daniel Robert DeChaine,2005-01-01 In Global Humanitarianism Daniel Robert Dechaine undertakes an historical cultural analysis of humanitarian NGO rhetoric and politics He focuses his study specifically on MZdecins Sans Fronti_res and the International Campaign to Ban Landmines This book besides being the first of its kind offers to the disciplines of political science cultural studies and sociology a model with which to consider the political and social roles of NGOs in the ever changing global community Intellectual Property Law and Policy Volume 10 Hugh Hansen,2008-03-26 Hart Publishing is pleased to announce that it has recently become publisher of this prestigious and much valued work The 15th Annual volume in the series collects the presentations and discussion from the Annual Fordham IP Conference The contributions by leading world experts analyze the most pressing issues in copyright trademark and patent law as seen from the perspectives of the USA the EU Asia and WIPO This volume in common with its predecessors seeks to make a lasting contribution to discourse in IP law few of the chapters are merely descriptive and most raise questions of policy or discuss new developments Praise for the Fordham International Intellectual Property Conference This must be one of the most enjoyable and thought provoking conferences in the IP field The high quality of the speakers is matched by the intense audience led debates and challenges which follow Hugh Laddie formerly Mr Justice Laddie University College London and consultant to Rouse Co Willoughby Partners Faculty for this conference are always well known names well respected leaders in their fields speaking with a combination of candor and timeliness that is unrivaled by any other forum of its kind The Honorable Marybeth Peters Register of Copyrights United States Copyright Office Lethal Force, the Right to Life and the ECHR Stephen Skinner,2019-08-22 In its case law on the use of lethal and potentially lethal force the European Court of Human Rights declares a fundamental connection between the right to life in Article 2 of the European Convention on Human Rights and democratic society This book discusses how that connection can be understood by using narrative theory to explore Article 2 law s specificities and its deeper historical social and political significance Focusing on the domestic policing and law enforcement context the book draws on an extensive analysis of case law from 1995 to 2017 It shows how the connection with democratic society in Article 2 s substantive and procedural dimensions underlines the right to life s problematic duality as an expression of a basic value demanding a high level of protection and a contextually limited provision allowing states leeway in the use of force Emphasising the need to identify clear standards in the interpretation and application of the right to life the book argues that Article 2 law s narrative dimensions bring to light its core purposes and values These are to extract meaning from pain and death ground democratic society s foundational distinction between acceptable force and unacceptable violence and indicate democratic society s essential attributes as a restrained responsible and reflective system **Presumption of Innocence Under China's 'National Conditions'** Alexandra Kaiser,2025-11-13 Drawing on broader legal political discourses within the party state and institutionalised academia this book shines a light on one of the most controversial legal principles in Chinese criminal justice the presumption of innocence It argues the reasons

why there is no presumption of innocence in China tracing the curve or evolution of academic discourse about presumption of innocence against the backdrop of changing politics or varying emphases on national conditions from Mao Zedong to Xi Jinping The book deepens our understanding of the trajectory of criminal justice reforms in the party state and shows how the more open and liberal phases of the reform era opened up some space for pluralist views and constructive criticism In comparison the second wave of autocratisation of the system influenced the conception of the criminal and paved the way for an illiberal turn

Indigenous Peoples, Consent and Rights Stephen Young, 2019-11-19 Analysing how Indigenous Peoples come to be identifiable as bearers of human rights this book considers how individuals and communities claim the right of free prior and informed consent FPIC as Indigenous peoples The basic notion of FPIC is that states should seek Indigenous peoples consent before taking actions that will have an impact on them their territories or their livelihoods FPIC is an important development for Indigenous peoples their advocates and supporters because one might assume that where states recognize it Indigenous peoples will have the ability to control how non Indigenous laws and actions will affect them But who exactly are the Indigenous peoples that are the subjects of this discourse This book argues that the subject status of Indigenous peoples emerged out of international law in the late 1970s and early 1980s Then through a series of case studies it considers how self identifying Indigenous peoples scholars UN institutions and non government organizations NGOs dispersed that subject status and associated rights discourse through international and national legal contexts It shows that those who claim international human rights as Indigenous peoples performatively become identifiable subjects of international law but further demonstrates that this does not however provide them with control over or emancipation from a state based legal system Maintaining that the discourse on Indigenous peoples and international law itself needs to be theoretically and critically re appraised this book problematises the subject status of those who claim Indigenous peoples rights and the role of scholars institutions NGOs and others in producing that subject status Squarely addressing the limitations of international human rights law it nevertheless goes on to provide a conceptual framework for rethinking the promise and power of Indigenous peoples rights Original and sophisticated the book will appeal to scholars activists and lawyers involved with indigenous rights as well as those with more general interests in the operation of international law

Routledge Handbook of International Law David Armstrong, 2009-01-13 This Handbook provides a definitive global survey of the interaction of international politics and international law
