University Historical Constitutional Fourteenth Revolution:

The Revolutionary Constitution David J. Bodenhamer, 2012-08-15 The framers of the Constitution chose their words carefully when they wrote of a more perfect union not absolutely perfect but with room for improvement Indeed we no longer operate under the same Constitution as that ratified in 1788 or even the one completed by the Bill of Rights in 1791 because we are no longer the same nation In The Revolutionary Constitution David J Bodenhamer provides a comprehensive new look at America s basic law integrating the latest legal scholarship with historical context to highlight how it has evolved over time The Constitution he notes was the product of the first modern revolution and revolutions are by definition moments when the past shifts toward an unfamiliar future one radically different from what was foreseen only a brief time earlier In seeking to balance power and liberty the framers established a structure that would allow future generations to continually readjust the scale Bodenhamer explores this dynamic through seven major constitutional themes federalism balance of powers property representation equality rights and security With each he takes a historical approach following their changes over time For example the framers wrote multiple protections for property rights into the Constitution in response to actions by state governments after the Revolution But twentieth century courts and Congress redefined property rights through measures such as zoning and the designation of historical landmarks diminishing their commercial value in response to the needs of a modern economy The framers anticipated just such a future reworking of their own compromises between liberty and power With up to the minute legal expertise and a broad grasp of the social and political context this book is a tour de force of Constitutional history and analysis

Tadjdini,2019-09-19 During the 20th century many countries embarked on a process of constitutional secularization by which the role of religion gradually became limited Yet by the late 20th century and increasingly following the end of the Cold War this development began to be challenged This book examines the return of religion in constitutions through the concept of constitutional de secularization It places this phenomenon in the context of the constitutional memory of the countries in which it has taken place and critically examines it against the development and standards of constitutionalism as the prevailing constitutional legal and political theory Central to this analysis is the impact of constitutional de secularization on the regulation of equality in liberty that is both the regulation of constitutional rights and the scope for equality of those who are granted such rights The book argues that equal liberty forms an essential part of constitutionalism as a theory and that constitutionalism therefore entails a continuous development towards expanding it The first and second part of the book presents a conceptual framework for the study of constitutional de secularization The third part presents and analyses three cases of constitutional de secularization in Afghanistan Iran and Iraq The book will be of interest to researchers and policy makers interested in constitutional history and theory and the role of religion in law and its compatibility with human rights
