Kay Redfield Jamison

Touched With Fire Manic Depressive Illness And The Artistic Temperament:

Touched With Fire Kay Redfield Jamison, 1996-10-18 The definitive work on the profound and surprising links between manic depression and creativity from the bestselling psychologist of bipolar disorders who wrote *An Unquiet Mind* One of the foremost psychologists in America Kay Jamison is plainly among the few who have a profound understanding of the relationship that exists between art and madness William Styron The anguished and volatile intensity associated with the artistic temperament was once thought to be a symptom of genius or eccentricity peculiar to artists writers and musicians Her work based on her study as a clinical psychologist and researcher in mood disorders reveals that many artists subject to exalted highs and despairing lows were in fact engaged in a struggle with clinically identifiable manic depressive illness Jamison presents proof of the biological foundations of this disease and applies what is known about the illness to the lives and works of some of the world's greatest artists including Lord Byron Vincent Van Gogh and Virginia Woolf **Touched with Fire** Kay R. Jamison, 1994 From the author of the New York Times bestseller *An Unquiet Mind* *Touched with Fire* is an authoritative look at the relationship between manic depressive illness and the artistic temperament Psychiatrist Jamison advocates a restrained humanistic approach to treatment that does not cure the disorder at the expense of artistic inspiration

Creative Dimensions of Suffering A. M. Ghadirian, 2009 *Creative Dimensions of Suffering* is an intriguing combination of psychiatry and spirituality that illustrates the power of creativity to treat suffering An examination of the lives of many famous artists who suffered including Van Gogh Tchaikovsky and Beethoven gives insight into how they dealt with their adversity through creativity Dr Ghadirian explores how various conditions such as alcoholism depression bipolar disorder and dementia can influence a person's creative impulse and how creativity and spirituality can help a person deal with trauma He describes the courage of many other well known figures such as Helen Keller and Christopher Reeve who were able to overcome their suffering and emerge victorious over daunting odds Finally drawing on principles found in the teachings of the Baha'i Faith Ghadirian attempts to explain suffering its place in human society and how it can lead us to a closer happier relationship with God as well as a better relationship with ourselves and with others Indeed many of those who have suffered the most have found new meaning through adversity and have emerged victorious *The Most Intimate Revelations about Touched with Fire* Lucas Syers, 2013-03 In this book we have hand picked the most sophisticated unanticipated absorbing if not at times crackpot original and musing book reviews of *Touched with Fire Manic Depressive Illness and the Artistic Temperament* Don't say we didn't warn you these reviews are known to shock with their unconventionality or intimacy Some may be startled by their biting sincerity others may be spellbound by their unbridled flights of fantasy Don't buy this book if 1 You don't have nerves of steel 2 You expect to get pregnant in the next five minutes 3 You've heard it all

Manic-Depressive Illness Frederick K. Goodwin, Kay Redfield Jamison, 2007-03-22 The revolution in psychiatry that began in earnest in the 1960s led to dramatic advances in the understanding and treatment of manic depressive illness Hailed as

the most outstanding book in the biomedical sciences when it was originally published in 1990 *Manic Depressive Illness* was the first to survey this massive body of evidence comprehensively and to assess its meaning for both clinician and scientist. It also vividly portrayed the experience of manic depressive illness from the perspective of patients, their doctors, and researchers. Encompassing an understanding about the illness as Kraepelin conceived of it, about its cyclical course, and about the essential unity of its bipolar and recurrent unipolar forms, the book has become the definitive work on the topic, revered by both specialists and nonspecialists alike. Now in this magnificent second edition, Drs. Frederick Goodwin and Kay Redfield Jamison bring their unique contribution to mental health science into the 21st century. In collaboration with a team of other leading scientists, a collaboration designed to preserve the unified voice of the two authors, they exhaustively review the biological and genetic literature that has dominated the field in recent years and incorporate cutting edge research conducted since publication of the first edition. They also update their surveys of psychological and epidemiological evidence as well as that pertaining to diagnostic issues, course, and outcome, and they offer practical guidelines for differential diagnosis and clinical management. The medical treatment of manic and depressive episodes is described; strategies for preventing future episodes are given in detail; and psychotherapeutic issues common in this illness are considered. Special emphasis is given to fostering compliance with medication regimens and treating patients who abuse drugs and alcohol or who pose a risk of suicide. This book, unique in the way that it retains the distinct perspective of its authors while assuring the maximum in depth coverage of a vastly expanded base of scientific knowledge, will be a valuable and necessary addition to the libraries of psychiatrists and other physicians, psychologists, clinical social workers, neuroscientists, pharmacologists, and the patients and families who live with manic depressive illness. *Bipolar Psychopharmacotherapy* Hagop S.

Akiskal, Mauricio Tohen, 2011-03-23 If a colleague were to ask me, "What would you recommend I read if I want to become a real expert on bipolarity?" I would respond, *Bipolar Psychopharmacotherapy: Caring for the Patient* (Journal of Bipolar Disorders). And the second edition is even better. *Bipolar Psychopharmacotherapy* covers both pharmacotherapy and the supportive role of psychotherapy, psychoeducation, and social approaches to provide a broad integrative philosophy of care for bipolar patients. Extensive coverage is given to special management issues such as the pharmacological care of women with bipolar disorder, children, and the elderly, as well as bipolar depression and suicide prevention. The mood swings that characterize bipolar disorder can now be better stabilized in most patients than in the past, but the illness must be carefully managed throughout a person's life. Pharmacotherapy is central to the acute treatment and long-term management, and as there are several classes of drugs which are often prescribed concurrently, treatment issues are complex. This essential reference work features critical reviews of the existing literature, plus information on new treatments that have been reported at peer-reviewed scientific meetings, often written by the pioneering experts on a particular treatment. The second-generation antipsychotics are now covered in separate chapters to provide in-depth coverage of these agents. There are also new

chapters on the pharmacological treatments of mixed states and rapid cycling and novel therapeutic vistas Diagnosing Churchill Wilfred Attenborough, 2019-04-19 The posthumous diagnosis of Winston Churchill as manic depressive has been drawn entirely from biographical information which though significant to understanding his life and mind has often been misused or misunderstood This book investigates how such materials have been interpreted and misinterpreted in relation to Churchill's mental health taking a particularly close look at his association with nerves or neurasthenia Included are appendices on Churchill's remedies for worry and mental overstrain and an investigation of his mental state after losing the 1945 general election **My Madness Saved Me** Thomas Szasz, 2017-12-02 The vast literature on Virginia Woolf's life work and marriage falls into two groups A large majority is certain that she was mentally ill and a small minority is equally certain that she was not mentally ill but was misdiagnosed by psychiatrists In this daring exploration of Woolf's life and work Thomas Szasz famed for his radical critique of psychiatric concepts coercions and excuses examines the evidence and rejects both views Instead he looks at how Virginia Woolf as well as her husband Leonard used the concept of madness and the profession of psychiatry to manage and manipulate their own and each other's lives Do we explain achievement when we attribute it to the fictitious entity we call genius Do we explain failure when we attribute it to the fictitious entity we call madness Or do we deceive ourselves the same way that the person deceives himself when he attributes the easy ignition of hydrogen to its being flammable Szasz interprets Virginia Woolf's life and work as expressions of her character and her character as the product of her free will He offers this view as a corrective against the prevailing ostensibly scientific view that attributes both her madness and her genius to biological genetic causes We tend to attribute exceptional achievement to genius and exceptional failure to madness Both says Szasz are fictitious entities *The Scientific American Reader to Accompany Myers* Scientific American, 2004-08 Hand picked by David Myers these 14 classic and current articles provide another tool for enhancing lectures encouraging discussions and emphasizing the relevance of psychology to everyday life Contents 1 Humbled History Robert Benjamin Illing 2 Rethinking the Lesser Brain James M Bower and Lawrence M Parsons 3 Promised Land or Purgatory Catherine Johnson 4 Music in Your Head Eckart O Altermuller 5 Sign Language in the Brain Gregory Hickok Ursula Bellugi and Edward S Klima 6 Television Addiction is No Mere Metaphor Robert Kubey and Mihaly Csikszentmihalyi 7 Islands of Genius Darold A Treffert and Gregory L Wallace 8 Emotion Memory and the Brain Joseph LeDoux 9 The Tyranny of Choice Barry Schwartz 10 The Mind Body Interaction in Disease Esther M Sternberg and Philip W Gold 11 Freud Returns Mark 11 Solms 12 Manic Depression and Illness and Creativity Kay Redfield Jamison 13 Decoding Schizophrenia Daniel C Javitt and Joseph T Coyle Scientific American 14 The Science of Persuasion Robert Cialdini *Scientific American Reader to Accompany Hockenbury/Hockenbury* Scientific American, 2000-06-30 Drawn from Scientific American and handpicked by the Hockenburys this reader is a collection of 9 articles that pertain to topics covered in the textbook A brief preface and series of discussion questions written by Don and Sandra Hockenbury accompany each
