Toward A Science Of Human Nature:

Toward a Science of Human Nature Daniel N. Robinson, 1982-01 Robinson unfolds the vision of four influential writers on psychology J S Mill F Hegel Wilhelm Wundt and William James who considered the world its persons and problems its possibilities and conflicts its scientific facts and its moral ambiguities and proceeded to devise a means by which to improve it Robinson shows how in thinking about psychology these individuals provided an intellectual context within which the discipline could be refined *Towards Rethinking Politics, Policy and Polity in the Anthropocene* Hans Günter

Brauch, 2025-02-24 Humankind faces two anthropogenic threats to its survival that are closely linked The first is the end of the Holocene and the start of the Anthropocene which was marked by the test of a nuclear bomb on 16 July 1945 In the prevailing peace and security narrative nuclear weapons and the other country bloc or alliance pose a perceived threat to humankind's survival In the Anthropocene narrative we are the threat through our way of life and the burning of fossil fuels The start of the Anthropocene coincides with a change in the international order with the setting up of the UN and the Bretton Woods Institutions Three stages of this order are distinguished the Cold War bipolarity the post Cold War era unipolarity and the end of the rule based global liberal order multipolarity on 24 February 2022 In this book ten multidisciplinary perspectives discuss complexity Anthropocene geopolitics peace and security discourses and the debate on the Anthropocene planetary boundaries complex crises and integrative geography in the Anthropocene governance and politics and the Patriacene and gender Both existential threats for humankind are illustrated by cover photos of the first nuclear weapons test on 16 July 1945 and by Category 5 Hurricane Otis an extreme weather event impacting on Acapulco in Mexico on 25 October 2023 The Anthropocene as a new epoch of Earth history coincides in 1945 with a change in the international order In the security and peace narrative the other and nuclear weapons pose an existential threat in the Anthropocene narrative This dual existential change requires a rethinking of politics policy and polity In the social sciences the Anthropocene is being discussed from multidisciplinary perspectives geography political science and peace security and gender studies This is an open access publication **Science of Human Nature and Art of Sustainable Happiness:**

Arrive 2 B U Emma-Shivani Brown Ph.D., 2019-09-30 Ultimately people want to be happy For most of us we seek happiness outside of ourselves We hope that our pursuit of a higher paying job a nicer house a new mate a faster speedboat etc will bring happiness These external desires might satisfy our appetite in the short term but when the shiny newness inevitably wears off we find ourselves feeling emotionally bankrupt and often in overwhelming debt We all want to know the secret to happiness even though very few of us actually have the motivation and dedication to work for it Recognizing and changing patterns of behavior that don't serve us adopting positivity practices living mindfully and flourishing often require a substantial life overhaul not just a makeover Here's the secret there is no secret to happiness Much research has been done and countless books classes conferences and programs come out every year each with a new take on this age old enigma

Towards a science of ideas: An inquiry into the emergence, evolution and expansion of ideas and their translation into action Guido Enthoven, Seweryn Rudnicki, Rico Sneller, 2022-08-02 Ideas are the basic building blocks that construct the world we live in Yet despite the abundance of literature on creativity and innovation there has been little reflection on ideas as such their nature and their working mechanisms This book provides foundations for a reflection focused specifically on ideas what they are how they emerge develop interact gain acceptance and become translated into actions In doing so the book moves beyond the mainstream approaches offering new promising theoretical angles presenting original findings and initiating a research agenda for a science of ideas This book provides a fresh perspective on how to conceptualize and study ideas and their working mechanisms by treating ideas as the main object of the study and by bringing together a group of original thinkers scholars and philosophers to move beyond the mainstream academic discourse on creativity and innovation

Toward a More Natural Science Leon R. Kass, 2008-06-30 Kass shows how the promise and the peril of our time are inextricably linked with the promise and the peril of modern science The relation between the pursuit of knowledge and the conduct of life between science and ethics each broadly conceived has in recent years been greatly complicated by developments in the science of life This book examines the ethical questions involved in prenatal screening in vitro fertilization artificial life forms and medical care and discusses the role of human beings in nature *The Science of Human Nature* James Fincher Boydston, 1912

Finding Answers History! Religion! Science! Pauline Schiappa, 2018-04-28 A mysterious and tremendous thing comes to reveal itself in the course of the lifetime of an earthly human So mysteriously confronted by it the earthly human becomes awed by this compelling human attribute The earthly human becomes so enraptured by it that he begins to consider it as a quality that defines and explains his human nature The earthly human desires to know the earthly human desires to understand that which his physical body sense experiences of earthly reality The earthly human holds so much psychological and intellectual desire toward knowing it that he gives it a name truth How does the earthly human discover truth

Towards a Critical Sociology (Routledge Revivals) Zygmunt Bauman, 2010-02-08 For the better part of its history sociology shared with commonsense its assumption of the nature like character of society and consequently developed as the science of unfreedom In this powerful and engaging work first published in 1976 Professor Bauman outlines the historical roots of such a science and describes how the new trends in sociology emerging from phenomenology and existentialism do not challenge this preoccupation Rather he claims they deepen and extend it by stressing the key role of commonsense particularly the ways in which it is sustained and embedded in the routines and assumptions of everyday life Professor Bauman sets out the form of a critical sociology based on emancipatory reason His main concerns are the validity of commonsense and the truth of a theory which would resolve to transcend the limitations of commonsensical evidence Aimed at human liberation A Critical Sociology is designed to question the very same routines and assumptions of everyday life

informed by commonsense **The Medical Research Novel in English and German, 1900-1950** Phillip A. Scott,1992
 There have been literary portraits of the doctor for hundreds of years but the doctor as the main character of a novel is largely a phenomenon of the 1900s Noting the great popularity of the doctor novel and its contribution to literature Scott characterizes and examines a significant subtype the medical research novel Paper edition unseen 13 95 Annotation copyrighted by Book News Inc Portland OR **The Battle for Human Nature** Barry Schwartz,1987 Suggests that modern science equates human nature with the single minded pursuit of self interest and presents examples from economics evolutionary biology and psychology that show this view will lead to society s destruction **Metaeconomics** Gary D. Lynne,2020-11-13 This book presents the Metaeconomics Framework and Dual Interest Theory which weave the empathy based moral and ethical dimension back into key economic questions Metaeconomics addresses the problem of placing too much emphasis on the market or the government and thus argues that seeing the link between ego and empathy self and other interest and market and government will lead to a more just fair and sustainable polity The unique Dual Interest Theory proposes that ego based self interest and empathy based other interest are joint and internal to each person it maintains the original proposition from Adam Smith that each person maximizes their own interest which Metaeconomics makes clear involves balancing the two joint interests although self interest is more primal The book begins with an explanation of how Metaeconomics connects the other kinds of economics The book then provides a series of applications of Metaeconomics in heated policy issues such as elections finance family food health natural resources education taxes and extreme inequality among others Finally the book concludes that the only way to save capitalism is to bring empathy into both private and public actions and bring about a more humane balance in market and government *Towards an Integrative Psychological Science* R.C. Tripathi,Bhoomika R. Kar,Namita Pande,2022-04-18 This edited volume examines the new ways of conceptualizing Psychology as an integrative science to understand human problems at the individual group societal and national levels It focuses on the need for Psychology to move away from its present reductionist perspective to an integrative psychological science perspective The volume is organized into three main sections The first discusses the convergence of qualitative and quantitative methodological approaches in Psychology The second part highlights the importance of social and personal wellness The third focuses on studying human behaviour in the context of cultural variations and the impact of cultural context on psychological processes The book includes contributions from leading scholars in psychology in India whose reference to practical social and political issues of contemporary interest makes the volume stand out This book serves as a resource to initiate the dialogue about the need issues levels and integration methods in Psychology which can be scientifically tested and theoretically explained The comprehensive and authoritative volume is of interest to researchers and scholars in cognitive psychology clinical psychology organizational psychology social psychology and cross cultural psychology *Science and Civilisation in China: Volume 1, Introductory Orientations* Joseph Needham,Ling Wang,1954 For

contents see Author Catalog **Social Science Quotations** Robert Merton, 2018-04-27 Social Science Quotations has been prepared to meet an evident unmet need in the literature of the social sciences Writings on the lives and theories of individual social scientists abound but there has been no fully documented collection of memorable quotations from the social sciences as a whole The frequent use of quotations in scientific as well as literary writings that are mere summaries or paraphrases typically fail to capture the full force of formulations that have made quotations memorable This book of quotations invites the further reading or rereading of the original texts beyond the quotations themselves Sills and Merton draw extensively upon the writings that constitute the historical core of the social sciences and social thought those works with staying power often described as the classical texts Many quotations have been drawn from these classical texts because the quotations contain memorable ideas memorably expressed Both consequential and memorable these words have been quoted over the generations entering into the collective memory of social scientists everywhere and at times diffusing into popular thought and into the vernacular as well This book is useful to social scientists anthropologists economists historians political scientists psychiatrists psychologists sociologists and statisticians and for all who want to learn or verify memorable formulations and phrases concerning social thought and social theories It is particularly useful for graduate students taking courses that examine the history of their discipline **The Culture of Science** Martin W. Bauer, Rajesh Shukla, Nick Allum, 2012-03-15 This book offers the first comparative account of the changes and stabilities of public perceptions of science within the US France China Japan and across Europe over the past few decades The contributors address the influence of cultural factors the question of science and religion and its influence on particular developments e g stem cell research and the demarcation of science from non science as well as issues including the incommensurability versus cognitive polyphasia and the cognitive intolerance of different systems of knowledge **Nature** Sir Norman Lockyer, 1903 *Reconstructing a Christian Theology of Nature* Revd Dr Anna Case-Winters, 2013-05-28 In the present ecological crisis it is imperative that human beings reconsider their place within nature and find new more responsible and sustainable ways of living Assumptions about the nature of God the world and the human being shape our thinking and consequently our acting Some have charged that the Christian tradition has been more a hindrance than a help because its theology of nature has unwittingly legitimated the exploitation of nature This book takes the current criticism of Christian tradition to heart and invites a reconsideration of the problematic elements its desacralization of nature its preoccupation with the human being to the neglect of the rest of nature its dualisms and elevation of the spiritual over material reality and its habit of ignoring or resisting scientific understandings of the natural world Anna Case Winters argues that Christian tradition has a more viable theology of nature to offer She takes a look at some particulars in Christian tradition as a way to illustrate the undeniable problems and to uncover the untapped possibilities In the process she engages conversation partners that have been sharply critical and particularly insightful feminist theology process thought and the religion and

science dialogue The criticisms and insights of these partners help to shape a proposal for a reconstructed theology of nature that can more effectively fund our struggle for the fate of the earth *Reconsideration of Science and Technology III* Liu Dachun, Yang Huili, Fan Shanshan, 2022-09-30 Drawing on debates from traditional and postmodern thoughts on science and technology the title builds a new theoretical framework to reconsider science and technology integrating the opposing viewpoints that either justify science or negate it As the third volume of a three volume set that proposes to reconsider science and technology and explores how the philosophy of science and technology responds to an ever changing world this final volume seeks to restore the cultural implications of science Across the six chapters the authors probe the prospect of a pluralistic scientific culture including discussions of diversified value choices the tension between reason and unreason other binary characteristics of scientific knowledge including objectivity and uniqueness universality and locality as well as the loss awakening and reconstruction of scientific culture The authors call for a transformation of scientific culture from a dominant culture to an affirmative one and envision a free and open world of science and technology The volume will appeal to scholars and students interested in the philosophy of science and technology the ideology of scientism and anti scientism modernism and postmodernism Marxist philosophy and topics related to scientific culture *The Art and Science of Personality Development* Dan P. McAdams, 2015-02-23 Drawing on state of the art personality and developmental research this book presents a new and broadly integrative theory of how people come to be who they are over the life course Preeminent researcher Dan P McAdams traces the development of three distinct layers of personality the social actor who expresses emotional and behavioral traits the motivated agent who pursues goals and values and the autobiographical author who constructs a personal story Highly readable and accessible to scholars and students at all levels the book uses rich portraits of the lives of famous people to illustrate theoretical concepts and empirical findings See also the Handbook of Personality Development edited by Dan P McAdams Rebecca L Shiner and Jennifer L Tackett
