Towards A New Executive Order In Europe West European Politics:

Towards A New Executive Order In Europe? Deirdre Curtin, Morten Egeberg, 2013-09-13 The executive branch of government in Europe is being gradually transformed in several significant respects First executive power has been continuously strengthened at the EU level in the form of the European Commission EU level agencies and diplomatic and military staff in the Union Council secretariat Second EU executive bodies relate directly to regulatory authorities at the national level in charge of applying and partly preparing EU laws and programmes partly circumventing ministerial departments Thus parts of national administrations become parts of an integrated and multi level Union administration as well as parts of national executives Such a system with multiple political masters raises delicate questions about political steering and accountability This book focuses on this fascinating development both from a political science and a legal perspective encompassing the consolidation of the supranational executive as well as its relationships with its partners at the national level This book was published as a special issue of West European Politics **Towards a New Executive Order in Europe?**, 2008

Interest Group Politics in Europe Jan Beyers, Rainer Eising, William A. Maloney, 2013-09-13 Interest organizations have always assumed a prominent place in European politics because they link states with citizens institutionalize the resolution of social conflicts regulate important sectors of the economy and society contribute to workable policy outcomes and socialize members into democratic politics However the plethora of interest group studies that exist have not consolidated our understanding of these actors These analyses have been subject to the vagaries of different theoretical perspectives and vary greatly in their conceptual and methodological frameworks Consequently a not always complementary and fragmented series of findings has emerged This book is a systematic and comprehensive effort at investigating and integrating the state of the art in European interest group research Combining the analysis of interest group politics in the EU with the comparative study of interest organizations the book seeks to identify the areas about which there is consolidated knowledge that are marked by controversies in which considerable uncertainty exists that have been omitted from research programs and that ought to be part of future studies Thereby it provides a general reflection on how the study of interest group politics can be improved by linking it to the comparative study of governance This book was published as a special issue of West European Politics

The Role of Parties in Twenty-First Century Politics Luciano Bardi, Stefano Bartolini, Alexander H. Treschel, 2017-10-02 For a long time analyses of political parties were framed within the usual context of democracy and of the historical transformation of the forms of democratic government More recently several authors among which eminently Peter Mair progressively began to question the relationship between the normative definition of democratic government and the actual operation of parties These new concerns are well epitomized by the tension between responsiveness and responsibility that gives the title to this book While classic democratic theory sees as desirable that parties in government and in opposition too are sympathetically responsive to their supporters first and more

generally to public opinion and at the same time responsible toward the internal and international systemic constraints and compatibilities these two roles seem to have become more difficult to reconcile and even increasingly incompatible The chapters of this book explore the tensions between responsiveness and responsibility decomposing the international sources from the domestic sources and discussing the options and the possibilities for political parties to continue to play the role of provider of political stability in rapidly changing domestic and international environments This book was published as a special issue of West European Politics

Decision making in the EU before and after the Lisbon Treaty Madeleine Hosli, Amie Kreppel, Běla Plechanovová, Amy Verdun, 2017-10-02 Decision making in the European Union before and after the Lisbon Treaty aims to assess what the changes the Treaty of Lisbon envisaged and whether these ambitions have materialised since the Treaty entered into force It offers analyses of the past as well as what might be the future because some provisions will only enter into effect in the years to come To what extent has the current decision making process been able to address the shortcomings and challenges of the past What has been the impact of aspects of the Lisbon Treaty that clarified pre existing norms and structures in some cases formalizing them rather than introducing new changes The authors in this book look at the interaction between formal rules and informal practices seeking to point to the interaction between the two They find that informal practices to date typically still dominate formal rules This book was published as a special issue of West European Politics

France's Political Institutions at 50 Emiliano Grossman, Nicolas Sauger, 2013-10-18 Fifty years after the creation of the Fifth Republic French politics is undergoing profound changes The election of Nicolas Sarkozy has announced a general review of the French political system A special committee the comit constitutionnel is currently drafting a catalogue of potential reforms Debates focus on issues like presidentialization parliamentary scrutiny of the executive or the creation of a popular initiative to trigger constitutional review of given legislative texts These discussions reflect long standing trends in the Fifth Republic This volume aims at analysing those trends and at outlining the major perspectives for future development In particular it puts the French political system in comparative perspectives and provides in depth analysis of the evolution of the major political institutions and their relations The volume argues that substantial reforms have helped to partially reshape French politics Yet it also shows that the fundamental characteristics of semi presidential government have stood firm The question is whether current debates and subsequent reforms are likely to alter the current pattern This book was published as a special issue of West European Politics

Accountability and European Governance Deirdre Curtin, Peter Mair, Yannis Papadopoulos, 2014-01-02 In recent years there has been a considerable effort in some transnational organizations and institutions to confront a crisis of legitimacy by promising more accountability and openness This volume takes as its central focus the role of accountability in democratic governance and attempts to position a broad understanding of the notion of accountability within the overall context of the evolving political system of governance in Europe and in particular of the European Union Bringing together new work by some of the leading

scholars in the field this volume considers the relationship between accountability and a wide range of other themes in European governance such as problems of representation transparency bureaucracy and transnational relations The volume also deals with the role of accountability in multi level governance and its relationship to both direct democracy and civil society This book was published as a special issue of West European Politics **Law and Administration** Carol Harlow, Richard Rawlings, 2009-08-20 A contextualised study setting out the foundations of administrative law with discussion of case law and legislation to show practical application Understanding Electoral Reform Reuven Hazan, Monique Leyenaar, 2014-06-03 The field of elections and electoral systems and particularly electoral reform has exhibited tremendous growth and cross national appeal over the last two decades However beyond an increased knowledge of voting rules and their consequences for political representation little attention has been devoted to the question of why electoral systems have recently undergone substantial change in several liberal democracies This book addresses several new approaches to electoral reform First the scope of the study of electoral reform has been expanded Second contrary to previous studies of electoral reform the conviction that the determinants of reform can be explained by one single approach has been replaced by a belief in a more comprehensive framework for analysis Third we move beyond political parties acting in parliament and government as the most significant source of electoral reform Fourth a focus on the determinants of electoral reform allows us to include motivations and objectives of electoral reform A final advancement in the study of electoral reform is the inclusion of countries other than established democracies This book was published as a special issue of West European Politics *Electoral Rules and Electoral Behaviour* Ruth Dassonneville, Marc Hooghe, Michael S. Lewis-Beck, 2018-12-07 Across representative democracies there is a strong variation in the rules that govern the electoral process A classic insight in political science is that these rules e g the presence of a majoritarian or a proportional system have a profound effect on the way a democracy functions We know less however about the way voters actually respond to these electoral rules This kind of effect presupposes that voters not only are aware of the electoral system but also that they adapt to the incentives offered by the system In this volume a group of international scholars investigate whether this is indeed the case The various chapters in this volume deal with the effect of proportionality mixed member systems compulsory voting and preferential voting The chapters are based on recent data and state of the art methods The introduction confronts the findings of the various chapters with the allegedly universal validity of vote choice models in the literature The research presented in this volume mainly deals with elections in Europe but the findings speak to the broader community of electoral scholars The chapters originally published as a special issue in West European Politics *Executive Power of the European Union* Deirdre Curtin, 2009 The picture of Brussels based bureaucrats exercising arbitrary executive powers is one of the favourite images conjured by Eurosceptics across the political spectrum This book offers a richer understanding of the nature of the EU's powers how they relate to national governments and how they are controlled **From Europeanisation to Diffusion**

Tanja A. Borzel, Thomas Risse, 2020-11-25 This book provides a comprehensive account of the extent to which policies and institutions of the European Union EU spread across different contexts Are the EU s attempts to transfer its policies and institutions to accession and neighbourhood countries sustainable and effective To what degree do other regions of the world emulate the EU s institutional features what are the mechanisms of and conditions for their diffusion Chapters deal with Europeanization in the new EU member states particularly in Romania and Bulgaria in current accession candidates i e the Western Balkans and Turkey as well the Eastern Southern Caucasus and Southern Neighbourhood Israel and the Maghreb In addition authors investigate the diffusion of EU policies and institutions in Sub Saharan Africa Asia and Latin America The authors place Europeanization studies in the wider context of research on transnational diffusion and examine the relevant mechanisms and processes including incentives and capacity building socialization and learning as well as functional and normative emulation Finally the book discusses what conditions lead to the successful diffusion of European institutions and policies such as domestic incentives degrees of limited statehood regime type and power a symmetries This book was originally published as a special issue of *West European Politics* *From Listening To Action: New Member States In European Union* Darina Malová, 2010 **The Party Politics of Territorial Reforms in Europe** Emanuele Massetti, Simon Toubeau, 2020-07-24 The book analyses how political parties compete and strategise on the issue of territorial reform using case studies that include countries from both Western Belgium Germany Italy and Spain and Central Eastern Europe Poland Slovakia and Romania Each case study considers different drivers of decentralization such as territorial identities and the demands of regionalist parties for territorial autonomy or independence efficiency concerns related to issues of uneven economic development and economic competitiveness the pressure from supra national organizations especially the EU as well as different combinations of these drivers They also consider how the ideology and organisation of state wide parties and the institutional context in which they compete shape their responses to these drivers and their strategy towards the question of territorial reform This collection investigates the logic of the actions that guide political parties strategy to highlight trends that are apparent across the case studies This book was originally published as a special issue of *West European Politics* **Power and Legitimacy** Peter L. Lindseth, 2010 The implications of European integration for national democracy and constitutionalism are well known Nevertheless as the events of the last decade made clear the EU s complex system of governance has been unable to achieve a democratic or constitutional legitimacy in its own right In *Power and Legitimacy Reconciling Europe and the Nation State* Peter L Lindseth traces the roots of this paradox to integration s dependence on the postwar constitutional settlement of administrative governance on the national level Supranational policymaking has relied on various forms of oversight from national constitutional bodies following models that were first developed in the administrative state and then translated into the European context These national oversight mechanisms executive legislative and judicial have over the last half century developed to address the central disconnect in the

integration process between the need for supranational regulatory power on the one hand and the persistence of national constitutional legitimacy on the other In defining the ways European public law has sought to reconcile these two conflicting demands Professor Lindseth lays the foundation for a better understanding of the administrative not constitutional nature of European governance going forward

Implementing Social Europe in Times of Crises Dorte Martinsen,Hans Vollaard,2017-10-02 While the EU legitimacy crisis and the Great Recession prevail certain European Union principles and policies have to be implemented in the member states This volume explores the diverse processes stages and subjects of implementation in a variety of social policies to identify different institutional dynamics and actor behaviours at play The individual contributions examine the transposition of the patients rights directive to the Europeanisation of pension reforms the role of national parliaments in transposing social Europe judicial Europeanisation and the multi level enforcement of EU decisions Theoretically the contributions in this book highlights the fact that implementation is often conditioned by domestic politics or comes as a random walk due to organisational and cognitive constraints Empirically the volume has three main findings First the constitutive components of the EU tend to have a contradictory impact on the EU s social policies and the national welfare systems Second crises influence the implementation of social Europe at times leading to a modification of fundamental principles and content but not across the board Third as a result there is evidence of differentiated Europeanisation This book was originally published as a special issue of West European Politics

Adjudicating New Governance Emilia Korkea-aho,2015-02-11 This book engages with and advances the current debate on new governance by providing a much needed analysis of its relationship with the courts New modes of governance have produced a plethora of instruments and actors at various levels that present a challenge to more traditional forms of command and control regulation In this respect it is commonly maintained that new governance generally and political experimentation more broadly weakens the power of the courts producing a legitimacy problem for new forms of governance and perhaps more fundamentally for law itself Focusing on the European Union this book offers a new account of the role of the courts in new governance Connecting new governance with the conception of deliberative democracy this book demonstrates how the role of courts has been transformed by the legal and political experimentation currently taking place in the European Union Drawing on a series of case studies it is argued that although deliberations in governance frameworks provide little by way of hard binding law these collaborative frameworks nevertheless condition judicial decision making With far reaching implications for how we understand the justiciability of soft law participation rights the legitimacy of governance measures and the role of courts beyond the nation state this book argues that far from undermining the power of the courts governance regimes assist their functioning Its analysis will therefore be of considerable interest for lawyers political scientists and anyone interested in the transformation of the judiciary in the era of new governance

The Routledge Handbook to Accountability and Welfare State Reforms in Europe Tom Christensen,Per Lægreid,2016-11-25 There is growing concern that

welfare states are inefficient unsustainable and lack popular support New Public Management reforms affected the balance between managerial and political accountability and disrupted administrative legal professional and social accountability causing confusion as to whom public organizations are really accountable The Routledge Handbook to Accountability and Welfare State Reforms in Europe assesses multi dimensional accountability relations in depth addressing the dynamic between accountability and reforms Analyzing how welfare state reforms oriented towards agencification managerialism and marketization affected existing relationships in services traditionally provided by public institutions the theoretically informed empirical chapters provide specific examples of their effect on accountability Expert contributors explore the relationship between accountability and performance and the impact of reforms on political administrative managerial legal professional and social accountability The role of specific actors such as the media and citizens on the accountability process addressing issues of blame avoidance reputation and autonomous agencies is discussed Comparative chapters across time countries administrative levels and policy areas are included along with discussions linking accountability with concepts like legitimacy democracy coordination and performance This handbook will be an essential reference tool to those studying European politics and public policy The Palgrave Handbook of the European Administrative System M. Bauer,J.

Trondal,2015-01-28 Drawing on research from the administrative sciences and using organizational institutional and decision making theories this volume examines the emerging bureaucratic framework of the EU and highlights that analyzing the patterns and dynamics of the EU s administrative capacities is essential to understand how it shapes European public policy

Agency Governance in the EU Berthold Rittberger,Arndt Wonka,2013-09-13 The rapid proliferation of EU agencies represents one of the most significant changes to the EU s organisational set up in past decades At the same time this development has significantly affected regulatory policy making in the EU This volume assembles the most renowned scholars in the field to address the key themes and challenges that agency governance in the EU poses to effective and legitimate policy making The first theme addresses the causes and dynamics of the creation and design of regulatory bodies in EU governance focusing not only on EU agencies but also on alternatives to the agency format such as regulatory networks Second once agencies are established the book goes on to explore the consequences and trajectories of agency governance How effective and autonomous are EU agencies How does EU agency governance transform existing patterns of executive governance in the EU Third the book addresses the design of EU agencies as independent non majoritarian institutions poses pressing questions with a view to their legitimacy and accountability The volume appeals to scholars and practitioners interested in the development and transformation of executive governance in the EU This book was published as a special issue of the Journal of European Public Policy
