Eleventh-Century Byzantium James Howard-Johnston,2020-09-10 The history of Byzantium pivots around the eleventh century during which it reached its apogee in terms of power prestige and territorial extension only then to plunge into steep political decline following serious military defeats and extensive territorial losses The political economic and intellectual history of the period is reasonably well understood but not so what was happening in that crucial intermediary sphere the social order which both shaped and was shaped by contemporary ideas and brute economic developments This volume aims to deepen understanding of Byzantine society by examining material evidence for settlements and production in different regions and by sifting through the far from plentiful literary and documentary sources in order to track what was happening in town and country There is evidence of significant change the pattern of landownership continued to shift in favour of those with power and wealth but there was sustained and effective resistance from peasant villages Provincial towns prospered in what was an era of sustained economic growth and through newly emboldened local elites took a more active part in public affairs In the capital the middling classes comprising much of officialdom and leading traders gained in importance while the twin military and civilian elites were merging to form a single governing class However despite this social upheaval careful analysis of these various factors by a range of leading Byzantine historians and archaeologists leads to the overarching conclusion that it was not so much internal structural changes which contributed to the vertiginous decline suffered by Byzantium in the late eleventh century as the unprecedented combination of dangerous adversaries on different fronts in the east north and west **Proceedings of the International Conference on Applied Science and Technology on**
