A Green History of the Welfare State Tony Fitzpatrick, 2017-03-16

Environmental problems particularly climate change have become increasingly important to governments and social researchers in recent decades Debates about their implications for social policies and welfare reforms are now moving towards centre stage What has been missing from such debates is an account of the history of the welfare state in relation to

environmental issues and green ideas A Green History of the Welfare State fills this gap How have the environmental and social policy agendas developed To what extent have welfare systems been informed by the principles of environmental ethics and politics How effective has the welfare state been at addressing environmental problems How might the history of social policies be reimagined With its lively chronological narrative this book provides answers to these questions Through overviews of key periods politicians and reforms the book weaves together a range of subjects into a new kind of historical tapestry including social policy economics party politics government action and legislation and environmental issues This book will be a valuable resource for students and scholars of environmental policy and history social and public policy social history sociology and politics

The Essential Guide to Planning Law Adam Sheppard, Deborah Peel, Heather Ritchie, Sophie Berry, 2017-02-15 This comprehensive yet concise textbook is the first to provide a focused subject specific guide to planning practice and law Giving students essential background and contextual information to planning's statutory basis the information is supported by practical and applied discussion to help students understand planning in the real world The book is written in an accessible style enabling students with little or no planning law knowledge to engage in the subject and develop the necessary level of understanding required for both professionally accredited and non accredited courses in built environment subjects The book will be of value to students on a range of built environment courses particularly urban planning architecture environmental management and property related programmes as well as law and practice orientated modules

One Hundred Years of Zoning and the Future of Cities Amnon Lehari, 2017-10-04 This book reconsiders the fundamental principles of zoning and city planning over the course of the past one hundred years and the lessons that can be learned for the future of cities Bringing together the contributions of leading scholars representing diverse methodologies and academic disciplines this book studies core questions about the functionality of cities and the goals that should be promoted via zoning and planning It considers the increasing pace of urbanization and growth of mega cities in both developed and developing countries changing concepts on the role of mixed use and density zoning new policies on inclusionary zoning as a way to facilitate urban justice and social mobility and the effects of current macrophenomena such as mass immigration and globalization on the changing landscape of cities The book's twelve chapters are divided into four parts each addressing different aspects of zoning and planning by combining theoretical analysis with a close observation of diverse case studies from North America and Europe to the Middle East and developing economies Part I offers a critical analysis of the conventional account of zoning as a top down form of land use regulation starting with the 1916 NYC code Part II studies how contemporary concepts of zoning both substantive and procedural impact the built environment across today's cities Part III revisits the economic foundations of zoning and urban policy in the context of domestic markets as compared with the regulatory and market effects of interstate agreements on cross border real estate investments Part IV analyzes the dominant yet often implicit social and political motives that are driving zoning policies across different countries

This volume's focus on the ties between zoning policy and economics, politics, socioeconomic conditions and the local to global scope of governance will appeal to scholars and students of political science, economics, law, planning, sustainability, geography, sociology and architecture as well as policy makers and practitioners especially those in developing countries and transitional and emerging economies

The Art of Building a Garden City Kate Henderson, Katy Lock, Hugh Ellis, 2019-08-14 The Art of Building a Garden City is a well researched guide to the history of the garden city movement and the delivery of a new generation of communities for the 21st Century. Bringing together key findings from the TCPA's campaign work and drawing on lessons from the first garden cities, the new towns programme and other large scale developments, it identifies what steps need to be taken in order to deliver the highest standards of design and place making today.

Planning in Britain Andrew Gilg, 2005-05-20 Planning in Britain examines the practical application of post war planning legislation and guides readers through the issues and methods needed to make an independent evaluation of the system today. It explains and assesses how Britain's land use planning system has evolved and its current structure. Why planning goals and planning results so frequently diverge. How planners can evaluate these outcomes. Features and Benefits: illustrative case studies, reviews of major legislation, data that provides a rich and accessible resource for mapping and analysing the planning system.

Regional Policy Ugo Fratesi, 2023-11-08 Regional policy is an essential in any government's toolkit for promoting socioeconomic prosperity. It comes in many forms and can be used to target the development of weak and stronger regions. This textbook provides comprehensive and systematic coverage of regional policy, dealing with core theories and looking at contemporary challenges in practice, addressing regional policy across the world. Structured in four parts, the book opens with an exploration of regional policy's characterisation, aims and rationale. The second part is devoted to issues of implementation and the instruments available to policymakers for intervention. The third part addresses regional policy evaluation as well as statistics and modelling in policymaking. Finally, the book discusses how regional policy is applied in different contexts. Each chapter contains real life examples of a regional policy topic in action and highlights supplementary topics for advanced readers. With its broad coverage of the subject, *Regional Policy: Theory and Practice* will prove a valuable resource for advanced students, researchers and practitioners in regional policy, regional economics, economic geography, planning and public policy.

Sustainable Infrastructure for Cities and Societies Michael Neuman, 2021-12-30 The central role of infrastructure to cities and in particular their sustainability is essential for proper planning and design, since most energy and materials are themselves consumed by or through infrastructures. Moreover, infrastructures of all types affect matters of economic and social equity due to access that they provide or prevent. *Sustainable Infrastructure for Cities and Societies* shows how fundamental planning, design, finance and governance principles can be adapted for sustainable infrastructure to provide solutions to make cities significantly more sustainable. By providing a contemporary overview on infrastructure, cities, planning, economics and sustainability, the book addresses how to

plan design finance and manage infrastructure in ways that reduce consumption and harmful impacts while maintaining and improving life quality It considers the interrelationships between the economic political societal and institutional frameworks providing an integrative approach including livability and sustainability principles and practice and planning and design It further translates these approaches that professionals policymakers and leaders can use This approach gives the book wide appeal for students researchers and practitioners hoping to build a more sustainable world
