Goal Setting for Students John Bishop, 2003 This book shows students how they can use goal setting in the classroom It is an eight section workbook that shows them how to overcome obstacles how to stay focused how their teacher uses goal setting and how students can measure their progress toward reaching their goals **The G.A.P. Model for Student Success** Stephanie Alarcon, 2018 Educators seek to develop well rounded individuals that are capable of adapting to the demands of our ever changing technological world However many secondary students merely go through the motions of our

current education system without taking personal ownership of their future. Therefore, there is a critical need to cultivate students' personal passion and self-motivation in order to prepare them for life beyond the classroom. One way to foster this motivation is by teaching and guiding students to set and monitor meaningful goals, which has been shown to yield higher performance in school, professional settings, and personal endeavors. While traditional goal-setting practices can be effective for secondary school students, they often focus solely upon academic pursuits and ultimately lack sustained accountability over the course of a student's secondary experience. The G A P Model for Student Success (Goal Setting Action Planning Progress Monitoring) was created to provide a holistic goal-setting system that has the potential to foster student-driven passion and self-motivation. Importantly, the G A P Model incorporates goals across four domains: e.g., social, emotional, academic, and life skills, so that students can take an active role in their short-term and long-term pursuits with the guidance of school staff as G A P mentors. Implementing the G A P Model involves gaining understanding of the current school climate, collaboration with staff and administration, staff training, student training, and following through to ensure effective implementation. With this collaborative approach, students are able to incorporate the four domains into personal goal setting, action planning, and progress monitoring as they move towards self-motivated academic and personal performance.
