The Effects of U.S. Trade Protection and Promotion Policies Robert C. Feenstra, 2008-04-15 Economists disagree on whether recent U S trade policies are harmful or helpful but they all agree that there is a new trend toward focusing on results oriented policies in specific markets and with particular trading partners These twelve essays by leading international economists explore crucial issues in U S trade policy today Topics examined include the markets for automobile and automobile parts in the United States and Japan the U S response to unfair trading practices such as dumping and the effects of industry and country specific policies Examples include high technology and agricultural industries and off shore assembly in U S border cities The volume concludes that some policies can act to both protect imports and promote exports that the threat of protectionist policies can often have effects that are as pronounced as

their implementation and that regulatory policy has as great an impact on trade and investment patterns as does trade policy itself. It will be of crucial interest to international trade economists, policy specialists and political scientists.

International Trade and Trade Policy Elhanan Helpman, Assaf Razin, 1991. Centering on questions of the potential optimality of some trade protection, these original contributions present research at the frontier of international trade and trade policy. They expand and test the new trade theory that has developed during the last decade, incorporating elements of industrial organization and political economy into the study of trade structure and the formation of trade policy. Essays in the first two parts take up trade policy, addressing issues such as the formation of trading blocks, strategic trade policy, the political economy of protection, growth-oriented trade policies, and including empirical studies of the welfare effects of quality upgrading, voluntary export restrictions, and import quotas. Essays in the third part discuss various structural issues, such as trade in services, intersectoral adjustments, and the advantage of early entry. Elhanan Helpman and Assaf Razin are Professors of Economics at Tel Aviv University and NBER Research Associates. Contents: Trade Policy Theory; Is Bilateralism Bad? Paul R. Krugman; Strategic Trade Policy and Direct Foreign Investment: When Are Tariffs and Quotas Equivalent? James A.
