Trading Price Action Trends Al Brooks, 2025-09-03 A practical guide to profiting from institutional trading trends The key to being a successful trader is finding a system that works and sticking with it Author Al Brooks has done just that By simplifying his trading system and trading only 5 minute price charts he's found a way to capture profits regardless of market direction or economic climate His first book Reading Price Charts Bar by Bar offered an informative examination of his system but it didn't allow him to get into the real nuts and bolts of the approach Now with this new series of books Brooks takes you step by step through the entire process By breaking down his trading system into its simplest pieces institutional piggybacking or trend trading the topic of this particular book in the series trading ranges and transitions or reversals this three book series offers access to Brooks successful methodology Price Action Trends Bar by Bar describes in detail what individual bars and combinations of bars can tell a trader about what institutions are doing This is critical because the key to making money in trading is to piggyback institutions and you cannot do that unless you understand what the charts are telling you about their behavior This book will allow you to see what type of trend is unfolding so can use techniques that are specific to that type of trend to place the right trades Discusses how to profit from institutional trading trends using technical

Again basic technical analysis tools are employed including measured moves box theory and A B C waves The key benefits of both playbooks are that they give you a well defined plan to follow This alleviates many of the big mistakes traders make such as over trading and cutting winners too early or sitting in losing trades too long If you are on the lookout for some trading ideas to simplify your analysis and refine your approach The Playbook is for you **Winning in the Commodities Market** George Angell,1979
