Traffic Transport Psychology Proceedings Of The Icttp 2000:

Traffic and Transport Psychology Talib Rothengatter, Raphael Denis Huguenin, 2004-09-08 This volume gives an overview of the trends in Traffic and Transport Psychology It reflects the considerable development of the most important factors for driving a road vehicle and the variety of international research approaches The first part contains basic approaches and integrated models as well as general theories and their implementation into Traffic and Transport Psychology The second part deals with the driver especially cognition performance social and differential effects and impairment Important aspects are treated such as speed perception reaction times interaction risk acceptance aggression and gender differences Special chapters refer to performance and fatigue The third part focuses on safety driver support selection and influencing drivers by enforcement training and programs for the rehabilitation of traffic offenders Classic ergonomic methods are discussed as well as modern telematic devices or trends regarding driver assessment In the last part current developments are presented in relation to better mobility and the protection of the environment Questions are asked such as whether we could reduce the use of cars how travel behaviour can be modified or to what extent the use of alternatives to motor vehicles benefits safety as well as the environment This work is not only important for psychologists It should be read by all transport professionals interested in the application of psychology to traffic

Traffic and Transport Psychology Talib Rothengatter, E. Carbonell Vaya (eds), 1997 Presents a balanced and representative overview of the major developments and trends in traffic and transport psychology This book deals with driver performance and social factors It presents arguments for integrated models for alternative paradigms and for a blatant a theoretical approach to driver behaviour **TRAFFIC and Transport**

Psychology Raphael D. Huguenin, Talib Rothengatter, 2004 **The Psychology of Driving on Rural Roads** Gert Weller, 2010-07-07 Rural roads constitute the most dangerous road category with regard to the number of fatal accidents In order to increase traffic safety on rural roads it is necessary to take into account not only their inherent properties but also their effect on behaviour Gert Weller develops a psychological model for driving on rural roads which is validated in three empirical steps laboratory simulator and driving experiments His results provide insight into the possibilities of how driving behaviour on rural roads can be influenced and give practical guidance for the enhancement of rural road safety The book is written for psychologists in the fields of traffic psychology and human factors research traffic engineers road planners as well as for political decision makers in traffic planning departments **Handbook of Traffic Psychology** Bryan E.

Porter, 2011-06-22 The Handbook of Traffic Psychology covers all key areas of research in this field including theory applications methodology and analyses variables that affect traffic driver problem behaviors and countermeasures to reduce risk on roadways Comprehensive in scope the methodology section includes case control studies self report instruments and methods field methods and naturalistic observational techniques instrumented vehicles and in car recording techniques modeling and simulation methods in vivo methods clinical assessment and crash datasets and analyses Experienced

researchers will better understand what methods are most useful for what kinds of studies and students can better understand the myriad of techniques used in this discipline Focuses specifically on traffic as opposed to transport Covers all key areas of research in traffic psychology including theory applications methodology and analyses variables that affect traffic driver problem behaviors and countermeasures to reduce the risk of variables and behavior Contents include how to conduct traffic research and how to analyze data Contributors come from more than 10 countries including US UK Japan Netherlands Ireland Switzerland Mexico Australia Canada Turkey France Finland Norway Israel and South Africa

David W. Eby, Lisa J. Molnar, Paula S. Kartje, 2008-12-22 By 2030 20 percent of the world's drivers 60 million in all will be over the age of 65 Consequently safe and efficient mobility for older adults is a complex and pressing issue Maintaining Safe Mobility in an Aging Society addresses the complexities surrounding the booming number of aging drivers and practical solutions for sustaining safe travel **Traffic and Transport Psychology** Geoffrey Underwood, 2005-06-09 Just as our

transport systems become more and more important to our economic and social well being so they become more and more crowded and more at risk from congestion disruption and collapse Technology and engineering can provide part of the solution but the complete solution will need to take account of the behaviour of the users of the transport networks The role of psychologists in this is to understand how people make decisions about the alternative modes of transport and about the alternative routes to their destinations to understand how novice and other vulnerable users can develop safe and effective behaviours how competent users can operate within the transport system optimally and within their perceptual and cognitive limitations The contributions to this volume address these issues of how the use of our transport systems can be improved by

taking into account knowledge of the behaviour of the people who use the systems Topics discussed include driver training and licensing driver impairment road user attitudes and behaviour enforcement and behaviour change driver support systems and the psychology of mobility and transport mode choice This work will be of value not only to psychologists but to all transport professionals interested in the application of psychology to traffic *Road Vehicle Automation 5* Gereon Meyer, Sven Beiker, 2018-06-25 This is the fifth volume of a sub series on Road Vehicle Automation published within the Lecture Notes in Mobility Like in previous editions scholars engineers and analysts from all around the world have contributed chapters covering human factors ethical legal energy and technology aspects related to automated vehicles as well as transportation infrastructure and public planning The book is based on the Automated Vehicles Symposium which was hosted by the Transportation Research Board TRB and the Association for Unmanned Vehicle Systems International AUVSI in San Francisco California USA in July 2017
