Tourism and Climate Change Susanne Becken, John E. Hay, 2007-08-17 This book discusses the tourism climate system and provides a sound basis for those interested in tourism management and climate change mitigation adaptation and policy In the first three chapters the book provides a general overview of the relationships between tourism and climate change and illustrates the complexity in four case studies that are relevant to the wide audience of tourism stakeholders In the following seven chapters detailed discussion of the tourism and climate systems greenhouse gas accounting for tourism mitigation climate risk management and comprehensive tourism climate policies are provided This book compiles and critically analyses the latest knowledge in this field of research and seeks to make it accessible to tourism practitioners and other stakeholders involved in tourism or climate change

The Routledge Handbook of Community Based Tourism Management Sandeep Kumar Walia, 2020-12-20 This Handbook offers an up to date and comprehensive overview of core themes and concepts in community based tourism management Providing interdisciplinary insights from leading international scholars this is the first book to critically examine the current status of community based tourism Organised into five parts the Handbook provides cutting edge perspectives on issues such as Indigenous communities tourism and the environment sustainability and the impact of digital communities Part 1 introduces core concepts and methodologies and distinguishes community products from other tourism and hospitality goods Part 2 explores communities attitudes towards tourism development and their engagement with and ownership of the process It also delves into the role of community based tourism under the influence of governmental policies in the economic and social development of a region In Part 3 various management marketing and branding initiatives are identified as a means of expanding the tourism business Part 4 examines the negative impacts of mass tourism and its threats to culture tradition identity the built environment and natural heritage In the final and fifth part future challenges and opportunities for community based tourism initiatives are considered and research based sustainable solutions are proposed Overall the book considers engaging local populations in tourism development as a way of building stronger and more resilient communities This Handbook fills a void in the current research and thus will appeal to scholars students and practitioners interested in tourism management tourism geography business studies development policy and practice regional development conservation and sustainability

Managing the Risks of Extreme Events and Disasters to Advance Climate Change Adaptation Christopher B. Field, Vicente Barros, Thomas F. Stocker, Qin Dahe, 2012-05-28 This Intergovernmental Panel on Climate Change Special Report IPCC SREX explores the challenge of understanding and managing the risks of climate extremes to advance climate change adaptation Extreme weather and climate events interacting with exposed and vulnerable human and natural systems can lead to disasters Changes in the frequency and severity of the physical events affect disaster risk but so do the spatially diverse and temporally dynamic patterns of exposure and vulnerability Some types of extreme weather and climate events have increased in frequency or magnitude but

populations and assets at risk have also increased with consequences for disaster risk Opportunities for managing risks of weather and climate related disasters exist or can be developed at any scale local to international Prepared following strict IPCC procedures SREX is an invaluable assessment for anyone interested in climate extremes environmental disasters and adaptation to climate change including policymakers the private sector and academic researchers *Climate Change 2014 - Impacts, Adaptation and Vulnerability: Part A: Global and Sectoral Aspects: Volume 1, Global and Sectoral Aspects* Intergovernmental Panel on Climate Change (IPCC),2014-12-29 This latest Fifth Assessment Report of the Intergovernmental Panel on Climate Change IPCC will again form the standard reference for all those concerned with climate change and its consequences including students researchers and policy makers in environmental science meteorology climatology biology ecology atmospheric chemistry and environmental policy **Climate Change 2014 - Impacts, Adaptation and Vulnerability: Global and Sectoral Aspects** Christopher B. Field,Vicente R. Climate Change 2007 - Impacts, Adaptation and Vulnerability Intergovernmental Panel on Climate Change. Working Group II.,2007 The Climate Change 2007 volumes of the Fourth Assessment Report of the Intergovernmental Panel on Climate Change IPCC provide the most comprehensive and balanced assessment of climate change available This IPCC Working Group II volume provides a completely up to date scientific assessment of the impacts of climate change the vulnerability of natural and human environments and the potential for response through adaptation Written by the world s leading experts the IPCC volumes will again prove to be invaluable for researchers students and policymakers and will form the standard reference works for policy decisions for government and industry worldwide **Climate Change as Environmental and Economic Hazard** Boris Porfiriev,2009-12 The current policy for climate change prioritises mitigation over adaptation The collected papers of Climate Change as Environmental and Economic Hazard argue that although efforts to reduce greenhouse gas emissions are still vital the new policy paradigm should shift the priority to adaptation with a special focus on disaster risk reduction It should also consider climate change not purely as a hazard and a challenge but as a window of opportunity to shift to a new sustainable development policy model which stresses the particular importance of communities resilience The papers in this volume explore the key issues linked to this shift including Increasing research into the Earth Sciences climate reconstruction and forecasting in order to decrease the degree of uncertainty about the origin development and implications of climate change The introduction of more binding and comprehensive regulation of both greenhouse gas emissions and adaptation measures like that in the United Kingdom Matching climate policy with that for disasters and mainstreaming it into overall development strategies The volume is a valuable addition to previous climate

change research and considers a new policy approach to this new global challenge
