Political Theologies in Orthodox Christianity Kristina Stoeckl, Ingeborg Gabriel, Aristotle Papanikolaou, 2017-06-15 This book gathers a wide range of theological perspectives from Orthodox European countries Russia and the United States in order to demonstrate how divergent the positions are within Orthodox Christianity Orthodoxy is often considered to be out of sync with contemporary society set apart in a world of its own where the church intertwines with the state in order to claim power over the populace and ignore the individual voices of modern societies As a collective these essays present a different understanding of the relationship of Orthodoxy to secular politics comprehensive up to date and highly relevant to politically understanding today's world The contributors present their views and arguments by drawing lessons from the past and by elaborating visions for how Orthodox Christianity can find its place in the contemporary liberal democratic order while also drawing on the experience of the Western Churches and denominations Touching upon aspects such as anarchism economy and political theology these contributions examine how Orthodox Christianity reacts to liberal democracy and explore the

ways that this branch of religion can be rendered more compatible with political modernity

Transcendence and Understanding Zdenko S. Sirka, 2020-03-04 This book brings into conversation Western and Orthodox hermeneutical schools one represented by Hans Georg Gadamer and his followers while the other school is less focused around one person and yet displays common distinct features The main question of the book is how we can mediate not only the content of understanding of who we are in relation to each other to the world in which we live and to God but also comprehend the process of understanding across various historical periods The strengths and weaknesses of both positions are presented and it is shown how these two hermeneutical approaches can enrich each other The book argues that preserving both positions and indicating how they complement each other helps show the limits of encountering the transcendent reality that can be testified to by human language without being reduced to it as such
