The Political Economy of Narcotics Julia Buxton,2013-07-04 This book explores the origins history and organisation of the international system of narcotic drug control with a specific focus on heroin cannabis and cocaine It argues that the century long quest to eliminate the production trade in and use of narcotic drugs has been a profound failure The statistics produced by the international and domestic narcotic drug control agencies point to a sustained expansion of the drug trade

despite the imposition of harsh criminal sanctions against those engaged as producers traffickers or consumers in the narcotic drugs market The roots of this major international policy failure are traced back to the outdated ideology of prohibition which is shown to be counterproductive utopian and a fundamentally inadequate basis for narcotic drug policy in the twenty first century Prohibition championed by many US policy makers has left the international community poorly positioned to confront those changes to the drug trade and drug markets that have resulted from globalisation Moreover prohibition based approaches are causing more harm than good as is demonstrated through reference to issues such as HIV AIDS the environment conflict development and social justice As the drug control system approaches its centenary there are signs that the global consensus on narcotic drug prohibition is fracturing Some European and South American states are pushing for a new approach based on regulation decriminalisation and harm reduction But those seeking to revise prohibition strategies faces entrenched resistance primarily by the U S This important text argues that successive American governments have pursued a contradictory approach acting decisively against the narcotic drug trade at home and abroad while at the same time working with drug traffickers and producer states when it is in America s strategic interest As a result US policy approaches emerge as a decisive factor in accounting for the failure of prohibition

Collective Securitization and Crisification of EU Policy Change Christian Kaunert,Sarah Léonard,2022-08-22 This book represents the first attempt to evaluate the first two decades of the EU counterterrorism policy It aims to assess the collective securitization process in EU counterterrorism evaluating this as a process between a construction of security threats and the development of supranational governance through crisification Compared to the lack of shared perception of the terrorist threat and the virtual absence of counterterrorism cooperation amongst European states in the 1970s and 1980s the existence of EU wide debates legislative instruments and practical cooperation nowadays is particularly remarkable The chapters in this volume explore this change and seek to explain it by drawing upon the concept of collective securitization The book posits that EU counterterrorism needs to be analysed as a process driven by collective securitization as part of an ongoing process of crisification that leads to increased supranational governance The book is both extremely relevant and timely for readers outside the area of research for several reasons First of all EU counterterrorism is often argued to be at the forefront of the EU s response to new security threats The EU acquis on the Area of Freedom Security and Justice AFSJ has grown significantly over the last years Consequently it is crucial and very timely to examine EU counterterrorism exactly 20 years after the first significant measures were adopted in the wake of 9 11 The chapters in this book were originally published in the journal Global Affairs

Historical Abstracts Eric H. Boehm,2000 **EU-Turkey Relations in the 21st Century** Birol A. Yeşilada,2012 The possibility of Turkey s accession to the European Union has been problematic Initially the EU s pursuit of regional economic integration and enlargement of membership at the exclusion of Turkey strained relations between the two It was not until 1999 and under pressure from the US that Turkey was considered as a potential candidate

for membership This book seeks to provide a comprehensive assessment of the fluctuating relations between the EU and Turkey in the twenty first century Applying complementary theoretical models to evaluate prospects for Turkey s membership analysis includes Turkey s report card on the Copenhagen criteria public opinion in Europe and Turkey and benefits and challenges based on projection estimates The results show that whilst both sides stand to make significant gains from Turkey s membership the current state of affairs point in the direction of a failure Examining complex issues surrounding EU Turkey relations and addressing the critical question of what will happen if Turkey is rejected by the EU this book will be of interest to students and scholars of politics Turkey and the wider Middle East **The Migration**
