through a teacher created home grown literacy program that aligns standards with student needs all while remaining cognizant of the teachers who implement the curriculum In the process teachers emerge as literacy leaders The leadership paradigm shifts away from the principal as sole decision maker and through a shared vision and collective efficacy classroom teachers and administration form an alliance that ensures success for all students Because it is the shared responsibility to adapt the program to the learner the hallmark of this instructional reform is relevant job embedded professional development that is provided in a timely fashion This fosters a democratic learning community where decisions are made together and the status quo is challenged Challenging the School Readiness Agenda in Early Childhood Education Miriam B.

Tager,2017-03-27 Challenging the normative paradigm that school readiness is a positive and necessary objective for all young children this book asserts that the concept is a deficit based practice that fosters the continuation of discriminatory classifications Tager draws on findings of a qualitative study to reveal how the neoliberal agenda of school reform based on high stakes testing sorts and labels children as non ready affecting their overall schooling careers Tager reflects critically on the relationship between race and school readiness showing how the resulting exclusionary measures perpetuate the marginalization of low income Black children from an early age Disrupting expected notions of readiness is imperative to ending practices of structural classism and racism in early childhood education Teaching L2 Composition Dana R.

Corgill, 2023-10-10 From the first chapter of Ann Marie Corgills *Of Primary Importance* What s Essential in Teaching Young Writers you experience the swirling energy the sights and the sounds of a primary classroom Forming the heart of the book are detailed units of study on poetry nonfiction and fiction writing that provide a clear demonstration of the writing workshop process at work throughout a school year You ll also find examples of favorite texts for teaching various craft components ideas for classroom organization and where to purchase materials suggestions for publishing student work lists of professional resources and most importantly inspiring examples of what children who are empowered to write can and will write *Of Primary Importance* is not a how to manual as much as it is a celebration of the idiosyncratic journey of teaching young children to write If you are a grade one through grade three teacher struggling to get your students writing well if you want to push your writing workshop to new dimensions or if you are just plain skeptical that primary kids can write something beyond I love my mom I love my dog The end this book is for you You will come away inspired challenged supported and wiser in your classroom writing instruction **Modern Curriculum for Gifted and Advanced Academic Students** Todd A. Kettler, 2021-09-03 *Modern Curriculum for Gifted and Advanced Academic Students* addresses the need for advanced curriculum design in an age of national standards and 21st century learning innovations The text and its authors work from the assumption that the most advanced learners need a qualitatively different design of learning experiences in order to develop their potential into outstanding achievement answering the question How should we design learning experiences for our most advanced academic students in the foundational curriculum areas This book

provides the most contemporary thinking about how to design in depth courses of study in the foundational curriculum areas with a high degree of complexity and advanced content The book includes chapters articulating specific design components like creative thinking critical thinking and authentic research but also subject specific chapters in mathematics language arts science and social studies to demonstrate application of those design components **From Form to Meaning** David Fleming,2011-06-12 In the spring of 1968 the English faculty at the University of Wisconsin Madison UW voted to remedialize the first semester of its required freshman composition course English 101 The following year it eliminated outright the second semester course English 102 For the next quarter century UW had no real campus wide writing requirement putting it out of step with its peer institutions and preventing it from fully joining the composition revolution of the 1970s In *From Form to Meaning* David Fleming chronicles these events situating them against the backdrop of late 1960s student radicalism and within the wider changes taking place in U S higher education at the time Fleming begins with the founding of UW in 1848 He examines the rhetorical education provided in the university s first half century the birth of a required two semester composition course in 1898 faculty experimentation with that course in the 1920s and 1930s and the rise of a massive current traditional writing program staffed primarily by graduate teaching assistants TAs after World War II He then reveals how starting around 1965 tensions between faculty and TAs concerning English 101 102 began to mount By 1969 as the TAs were trying to take over the committee that supervised the course the English faculty simply abandoned its long standing commitment to freshman writing In telling the story of composition s demise at UW Fleming shows how contributing factors the growing reliance on TAs the questioning of traditional curricula by young instructors and their students the disinterest of faculty in teaching and administering general education courses were part of a larger shift affecting universities nationally He also connects the events of this period to the long embattled history of freshman composition in the United States And he offers his own thoughts on the qualities of the course that have allowed it to survive and regenerate for over 125 years *The Other Path* Corinne Jeffery,2023-01-04 Alyssa Rainer is on the cusp of graduating as a registered nurse and has her whole life ahead of her Yet she is torn between two alluring opportunities starting her career while continuing her studies in Saskatoon or relocating from Brandon to Winnipeg where a whirlwind romance tempts her to abandon her long held plans Should Alyssa follow her heart or her mind Set in the mid 1960s Alyssa s young life is scarred by the death of her brother her father s racism her mother s abuse and her parents tumultuous marriage which make her eager to venture off on her own But the ghosts of the past haunt her and despite Alyssa s successes the future she had envisioned does not unfold as anticipated Decades later Alyssa reflects on the tough choices she made during her life wondering What if What if she had taken a different path like the doppelgänger she has been mistaken for over the years who appears to be living a parallel life perhaps the one meant for Alyssa *Resources in Education* ,1998 Writing and Learning in Cross-national Perspective David Foster,2017-10-03 Despite the increasingly global implications of conversations

about writing and learning U S composition studies has devoted little attention to cross national perspectives on student writing and its roles in wider cultural contexts Caught up in our own concerns about how U S students make the transition as writers from secondary school to postsecondary education we often overlook the fact that students around the world are undergoing the same evolution How do the students in China England France Germany Kenya or South Africa the educational systems represented in this collection write their way into the communities of their chosen disciplines How for instance do students whose mother tongue is not the language of instruction cope with the demands of academic and discipline specific writing And in what ways is U S students development as academic writers similar to or different from that of students in other countries With this collection editors David Foster and David R Russell broaden the discussion about the role of writing in various educational systems and cultures Students development as academic writers raises issues of student authorship and agency as well as larger issues of educational access institutional power relations system goals and students roles in society The contributors to this collection discuss selected writing purposes and forms characteristic of a specific national education system describe students agency as writers and identify contextual factors social economic linguistic cultural that shape institutional responses to writing development In discussions that bookend these studies of different educational structures the editors compare U S postsecondary writing practices and pedagogies with those in other national systems and suggest new perspectives for cross national study of learning writing issues important to all educational systems Given the worldwide increase in students entering higher education and the endless need for effective writing across disciplines and nations the insights offered here and the call for further studies are especially welcome and timely
