

Tests and Adjustments

Throttle Cable Adjustment

Reason:

To make sure the throttle cable moves the throttle and choke control lever through its full range of movement.

Procedure:

1. Set the throttle lever in the slow idle position. Check that the throttle control lever (A) contacts the idle speed adjustment screw (B) at the slowest throttle lever setting.

MX11094

2. If the throttle control lever (A) is not touching the screw (B) at the slowest setting, loosen the throttle cable clamp (C). Pull throttle cable to left. When the control lever contacts the control plate idle adjustment screw, retighten the cable clamp.
3. Set the throttle lever to the fastest idle position. Check that the throttle control lever is advancing to the full open position.
4. If the control lever is not advancing to the full open position, loosen the cable clamp and readjust the cable.
5. If the cable cannot be adjusted to obtain the full open throttle lever position at fastest idle, while maintaining contact with the adjustment screw at lowest idle position, it will be necessary to adjust the control plate idle speed adjustment screw.
6. Turn the idle adjustment screw (B) clockwise until it contacts the throttle control lever when set in the slow idle position. After completing the idle screw adjustment, check to make certain the motor is maintaining a 1550 RPM governed low idle setting. Follow the Low Idle Speed Adjustment sequence in this chapter if corrections are necessary.

Choke Adjustment

Reason:

To make sure the choke plate is fully closed when the choke lever is in the full choke position. Correct adjustment also makes sure choke is completely open in the fast idle position.

Procedure:

NOTE: Adjust throttle cable before adjusting choke.

1. Remove air cleaner assembly.

MX11095

2. Move choke lever forward to full choke position. Check that the choke butterfly (B) in the carburetor is fully closed.
3. If adjustment is necessary, loosen the choke cable clamp (A). Move the cable to obtain a fully closed position. Retighten the cable clamp.
4. Release the choke lever and make certain the return spring on the governor control plate is returning the choke butterfly to the fully open position.
5. Reinstall the air cleaner assembly and check the choke operation while starting the machine.
