Guidelines for Slope Performance Monitoring Robert Sharon,Erik Eberhardt,2020-07-01 Although most mining
companies utilise systems for slope monitoring experience indicates that mining operations continue to be surprised by the
occurrence of adverse geotechnical events A comprehensive and robust performance monitoring system is an essential
component of slope management in an open pit mining operation The development of such a system requires considerable
expertise to ensure the monitoring system is effective and reliable Written by instrumentation experts and geotechnical
practitioners Guidelines for Slope Performance Monitoring is an initiative of the Large Open Pit LOP Project and the fifth
book in the Guidelines for Open Pit Slope Design series Its 10 chapters present the process of establishing and operating a
slope monitoring system the fundamentals of pit slope monitoring instrumentation and methods monitoring system operation
data acquisition management and analysis and utilising and communicating monitoring results The implications of increased
automation of mining operations are also discussed including the future requirements of performance monitoring Guidelines
