focuses on Indonesia and investigates why competition between various identity affiliated groups to claim a new province increases conflict severity It includes a quantitative study along with complementary case studies of provinces in Indonesia which provide evidence that group fragmentation plays a role in determining conflict during a new province s struggle Against the background of the Indonesian government s territorial autonomy TA strategy regional proliferation or pemekaran the author examines the long term decentralization project in Indonesia which has an ethnically and religiously divided population The book provides answers to the questions of how the new province claim increases conflict in the supporting districts and how competition among diverse elites in districts pursuing a new province precipitate conflict within the region Based on extensive field research the four case studies of districts with varying degrees of conflict reveal that the campaign for a new province proliferation increases the probability of conflict at the district level and conflict can escalate during the initiation of a new province stage The author argues that more provinces may be necessary to ensure the fair distribution of wealth that would enable the whole population to enjoy a similar quality of life and that the Indonesian government needs to wisely and strategically uphold its unity if a federal arrangement is not an option Offering a novel contribution to the study of the relationship between territorial change and conflict in Indonesia this book will be of interest to academics studying Indonesian politics Southeast Asian politics as well as identity and ethnic politics *Writing Ethnographic Fieldnotes* Robert

M. Emerson,Rachel I. Fretz,Linda Shaw,1995 **The Cost of Being Undocumented** Alix Dick,Antero Garcia,2025-06-17 An undocumented activist and a social scientist come together to tally of the structural costs of undocumented life An inhumane math pervades this country even as our government extracts labor and often taxes from undocumented workers it excludes these same workers from its social safety net As a result these essential workers struggle to get their own basic needs met from healthcare to education from freedom of association to the ability to drive to work without looking for ICE in

the rearview mirror When Alix Dick s family found themselves in the crosshairs of cartel violence in Sinaloa Mexico she and her siblings were forced to flee to the U S Many of the scenes that she shares are difficult and unforgettable escaping from a relationship in which her partner threatened to report her to immigration getting root canals done in an underground dental clinic But there are moments of triumph too founding her own nonprofit working on films that tell important stories and working with her co author Dr Garcia to tell her story in a framework that lays bare the realities of structural oppression As Alix and Antero tally the costs of undocumented life they present a final bill of what is owed to the immigrant community In this way their book flips the traditional narrative about the economics of immigration on its head

Writing ethnographic fieldnotes Robert M. Emerson,2000 **Writing Ethnographic Fieldnotes** Robert M. Emerson et. al,2011 [The Chicago Guide to Collaborative Ethnography](#) Luke Eric Lassiter,2024-05-31 Collaboration between ethnographers and subjects has long been a product of the close intimate relationships that define ethnographic research But increasingly collaboration is no longer viewed as merely a consequence of fieldwork instead collaboration now preconditions and shapes research design as well as its dissemination As a result ethnographic subjects are shifting from being informants to being consultants The emergence of collaborative ethnography highlights this relationship between consultant and ethnographer moving it to center stage as a calculated part not only of fieldwork but also of the writing process itself *The Chicago Guide to Collaborative Ethnography* presents a historical theoretical and practice oriented road map for this shift from incidental collaboration to a more conscious and explicit collaborative strategy Luke Eric Lassiter charts the history of collaborative ethnography from its earliest implementation to its contemporary emergence in fields such as feminism humanistic anthropology and critical ethnography On this historical and theoretical base Lassiter outlines concrete steps for achieving a more deliberate and overt collaborative practice

throughout the processes of fieldwork and writing As a participatory action situated in the ethical commitments between ethnographers and consultants and focused on the co construction of texts collaborative ethnography argues Lassiter is among the most powerful ways to press ethnographic fieldwork and writing into the service of an applied and public scholarship A comprehensive and highly accessible handbook for ethnographers of all stripes The Chicago Guide to Collaborative Ethnography will become a fixture in the development of a critical practice of anthropology invaluable to both undergraduates graduate students and faculty alike

Writing Ethnography (Second Edition) Jessica Smartt Gullion, 2021-11-29 Ethnographers spend a tremendous amount of time in the field collecting all sorts of empirical material but how do they turn their work into books or articles that people actually want to read This concise engaging guide will help academic writers at all levels to write better Many ethnography textbooks focus more on the ethno portion of our craft and less on developing our graph skills Gullion fills that gap helping ethnographers write compelling authentic stories about their fieldwork From putting the first few words on the page to developing a plot line to publishing Writing Ethnography offers guidance for all stages of the writing process

From Notes to Narrative Kristen Ghodsee, 2016-05-10 Ethnography centers on the culture of everyday life So it is ironic that most scholars who do research on the intimate experiences of ordinary people write their books in a style that those people cannot understand In recent years the ethnographic method has spread from its original home in cultural anthropology to fields such as sociology marketing media studies law criminology education cultural studies history geography and political science Yet while more and more students and practitioners are learning how to write ethnographies there is little or no training on how to write ethnographies well From Notes to Narrative picks up where methodological training leaves off Kristen Ghodsee an award winning ethnographer addresses common issues that arise in ethnographic writing Ghodsee works through sentence level details such as word choice and structure She also tackles bigger picture elements such as how to incorporate theory and ethnographic details how to effectively deploy dialogue and how to avoid distracting elements such as long block quotations and in text citations She includes excerpts and examples from model ethnographies The book concludes with a bibliography of other useful writing guides and nearly one hundred examples of eminently readable ethnographic books
