Published in 1990 Children with Literacy Difficulties presents the work of a number of teachers with considerable experience of helping children with problems The difficulties which some children experience in the area of reading have often been considered separately from the same children s possible problems in the areas of writing spelling and handwriting This is no longer realistic Nowadays most teachers appreciate the importance of linking all teaching in the language field As a result throughout the school it should become impossible to erect barriers between oral dialogue writing both by hand and using the computer and reading All these aspects receive attention in the book This book is an essential read for teachers and researchers of primary secondary education teaching and learning school education and education in general *Early Years*

The Role of Subject Knowledge in the Early Years of Schooling Carol Aubrey,2022-11-21 Originally published in 1994 the aim of the authors was to provide a comprehensive introduction to recent advances in research which had been made in learning and teaching in the early years of schooling at the time Emphasis is placed on how subject knowledge is constructed or acquired and the organization of teaching to promote the learner s active construction of meaning through the integration of new knowledge with existing understanding The National Curriculum is founded in subject knowledge though little examination appears to have been made of this in terms of how subject matter is transformed into the content of teaching that young children can understand It this remains for the teacher to develop instruction through the creation of a curriculum content and sequence which both reflects and advances the structure of existing forms of representation problem solving and knowledge which the child brings to the school The whole thrust of the book challenges the conventional early years ideology with its emphasis on child centred concrete and empirical approaches to learning with a view of teaching which is concerned with making sense of children s understanding and allowing their active construction of knowledge and
