Phenomenology of Practice Max van Manen, 2023-06-08 Max van Manen offers an extensively updated edition of *Phenomenology of Practice: Meaning-Giving Methods in Phenomenological Research and Writing* to provide an eloquent, accessible, and detailed approach to practicing phenomenology. *Phenomenology of Practice* refers to the meaning of doing phenomenology on experiences that are of significance to those in professional practice such as psychology, health care, education, and in contexts of ordinary living. A special feature of this update is the role of examples, anecdotes, stories, and vignettes, and the singularity of fictionalized empirical fragments in making the unknowable knowable. Accordingly, the various chapters are enriched with many intelligible examples of phenomenological essays and excursions on ordinary and extraordinary topics. These examples show that a phenomenological method can be engaged to explore virtually any lived experience or event. Max van Manen provides penetrating portrayals of depthful insights by brilliant phenomenologists. He identifies and distinguishes a variety of phenomenological orientations that are alive and current today. This book is relevant

Phenomenology and the Extreme Sport Experience Eric Brymer, Robert Schweitzer, 2017-03-27 Understanding the motivations behind those who partake in extreme sports can be difficult for some If the popular conception holds that the

incentive behind extreme sports participation is entirely to do with risking one's life then this confusion will continue to exist. However, an in-depth examination of the phenomenology of the extreme sport experience yields a much more complex picture. This book revisits the definition of extreme sports as those activities where a mismanaged mistake or accident would most likely result in death. Extreme sports are not necessarily synonymous with risk and participation may not be about risk-taking. Participants report deep inner transformations that influence world views and meaningfulness, feelings of coming home and authentic integration as well as a freedom beyond the everyday. Phenomenologically, these experiences have been interpreted as transcendent of time, other space, and body. Extreme sport participation therefore points to a more potent life-enhancing endeavour worthy of further investigation. This book adopts a broad hermeneutic phenomenological approach to critique the assumed relationship to risk-taking, the death wish, and the concept of No Fear in extreme sports and repositions the experience in a previously unexplored manner. This is valuable reading for students and academics interested in Sports Psychology, Social Psychology, Health Psychology, Tourism, Leisure Studies, and the practical applications of phenomenology.

Arts-Based Research, Autoethnography, and Music Education miroslav pavle manovski, 2014-07-03 Arts Based Research Autoethnography and Music Education *Singing Through a Culture of Marginalization* invites readers into miroslav pavle manovski's journey into quest of how he found his voice literally and figuratively by reflecting and storying from his fluid identity and roles as an artist, singer, learner, music teacher, researcher while empowering others to find their own voice. This book is also an arts-based autoethnographic rendering of the author's experience being tormented, harassed, and called gay as a means to negatively target and marginalize him. Further, this work contributes to the literature of those mercilessly harassed for perceived effeminate characteristics and to the canon of ways we may be able to rescue ourselves to positively transform from prior wreckage a part of our lives. It makes significant contributions to the literature on qualitative inquiry, arts-based research, autoethnography, music education, and vocal pedagogy as a means of re-presenting a rich tapestry of life experience. While this text can be read entirely for pleasure or personal growth, it will make an outstanding springboard for conversation in courses across the disciplines that deal with teacher education, music education, gender and sexual identity, orientation, intimacy, relationships, and relational communication, prejudice, bullying, and more. This award-winning book will additionally be of great value in courses on autoethnography, life writing, narrative inquiry, arts-based research, and music education. Of all the recent examples of textual experiments in the social sciences that aim to create a dialectical intertwining of the autobiographical and the theoretical, this book is among the very best. Manovski's work is at once artful, poignant, bravely self-revelatory while simultaneously informed by the scholarship of an impressive array of academics from diverse academic fields. What awaits the reader is nothing less than a full-fledged educational experience that dazzles the mind and stirs the heart as it opens up the future. Handbook of Phenomenology and Medicine S. Kay Toombs, 2012-12-06 As the fields of philosophy of medicine and bioethics have developed in the United States the philosophical perspective of phenomenology has been largely ignored Yet the central conviction that informs this volume is that phenomenology provides extraordinary insights into many of the issues that are directly addressed within the world of medicine Such issues include the nature of medicine itself the distinction between immediate experience and scientific conceptualization the nature of the body and the implications of embodiment in the realm of clinical practice the meaning of health illness and disease the problem of intersubjectivity particularly with respect to achieving successful communication with another the complexity of decision making in the clinical context and in the realm of medical ethics the

possibility of empathic understanding the theory and method of clinical practice and the essential characteristics of the therapeutic relationship i e the relationship between the sick person and the one who professes to help Some of the authors who have contributed to this volume are philosophers some are engaged in other academic disciplines and several are practicing healthcare professionals
