strategies in terms of their impact or potential impact on alcohol use and abuse by adolescents They are organized in terms of a micro macro environmental perspective moving from the smaller microcosm of the family through school settings communities and large governmental jurisdictions The papers in this issue lay the foundation for future avenues of inquiry and highlight some very important emergent research themes It is clear that family systems are attracting attention as potential environments for preventive interventions Historically families have been perceived as sources of alcohol problems and targets of treatment Now they are being viewed as possible protective systems and settings for deliberate intervention before alcohol related problems actually occur An Exploratory Study of how Pre-adolescent Foster Children Story Their Life Experiences Jason B.
