The Interiors Theory Primer William Mangold, 2025-07-31 In a world where life is increasingly defined by the spaces we inhabit understanding interiors is essential to understanding ourselves The Interiors Theory Primer maps the intellectual terrain of interior design and spatial experience introducing readers to key concepts that shape how people occupy interior spaces Organized into three parts this book begins with foundational concerns such as place identity materiality and atmosphere and then examines the boundaries and expertise of the discipline before turning to critical and emerging topics like biophilia virtuality and social justice Each chapter presents a focused literature review of a major theme in interiors theory supported by key design precedents and suggestions for further reading Drawing on a wide range of scholarship The Interiors Theory Primer offers a coherent framework for understanding interiors as a distinct interdisciplinary field deeply embedded in the human condition Accessible to students useful to professionals and provocative for scholars The Interiors Theory Primer argues that the designed environments in which we live work and gather deserve greater attention not only for their aesthetic and functional qualities but also for their powerful role in shaping contemporary life

Mid-Century Modern Interiors Lucinda Kaukas Havenhand, 2019-01-24 Mid Century Modern Interiors explores the history of interior design during arguably its most iconic and influential period The 1930s to the 1960s in the United States was a key moment for interior design It not only saw the emergence of some of interior design s most globally important designers it also saw the field of interior design emerge at last as a profession in its own right Through a series of detailed case studies this book introduces the key practitioners of the period world renowned designers including Ray and Charles Eames Richard Neutra and George Nelson and examines how they developed new approaches by applying systematic and rational principles to the creation of interior spaces It takes us into the mind of the designer to show how they each used interior design to express their varied theoretical interests and reveals how the principles they developed have become embodied in the way interior design is practiced today This focus on unearthing the underlying ideas and concepts behind

their designs rather than on the finished results creates a richer more conceptual understanding of this pivotal period in modernist design history With an extended introduction setting the case studies within the broader context of twentieth century design and architectural history this book provides both an introduction and an in depth analysis for students and scholars of interior design architecture and design history The Secret Life of the Modern House Dominic Bradbury, 2021-04-01 Informative and entertaining this publication is a feast for the eyes while also thought provoking and offers excellent inspiration for daydreaming about what makes the perfect modern house Wallpaper A fascinating selection of innovative homes this is a thoughtful journey through the evolution of domestic architecture Sunday Express Over the last century the way that we live at home has changed dramatically Nothing short of a design revolution has transformed our houses and the spaces within them moving from traditional patterns of living all the way through to an era of more fluid open plan and modern styles Whether we live in a new home or a period house our spaces will have been shaped one way or another by the pioneering Modernists and Mid century architects and designers who argued for a fresh way of life Architectural and design writer Dominic Bradbury charts the course of this voyage all the way from the late 19th century through to the houses of today in this ground breaking book Over nineteen thematic chapters he explains the way our houses have been reinvented while taking in along the way the giants of Art Deco influential Modernists including Le Corbusier and Frank Lloyd Wright as well as post war innovators such as Eero Saarinen and Philip Johnson Taking us from the 20th to the 21st century Bradbury explores the progress of modernity itself and reveals the secret history of our very own homes

Gorst's work is rooted in the architect's own journey. Starting out as a neo-classicist, Gorst ultimately became frustrated by the restrictions and historicism of the classical approach and reinvented himself as a dedicated modernist yet continued to place particular emphasis on a love of proportion, scale, symmetry and detailing. Ranging from rural projects which reflect the vernacular traditions of the surrounding countryside including large contemporary country houses like RIBA award winning Ironstone House to others which creatively reinvent and add to period properties along with new and innovative urban homes, all are defined by a particular ambition to be innovative, fresh and one of a kind. Each of Gorst's houses represents a particular journey informed by the client and their needs, the context of the site and a response to landscape and setting which is often reflected in his choice of natural textures and materials.
