

Toward Maximum Diversification Choueifaty

Dr. Samar Deb

Toward Maximum Diversification Choueifaty:

Towards Maximum Diversification Yves Choueifaty, 2022 Along with the ongoing effort to build market cap independent portfolios the authors explore the properties of Diversification as a driver for portfolio construction They introduce a measure of the diversification of portfolios that they term the diversification ratio The measure is then employed to build risk efficient portfolios the Most Diversified Portfolios and theoretical properties of the resulting portfolios are discussed per se and compared to other popular methodologies market cap weights equal weights minimum variance Empirical results confirm that those popular methodologies are dominated by risk efficient portfolios in many aspects The implication is that in the long run actively managed portfolios which maximize diversification are strong candidates for achieving consistently better results than commonly used passive index tracking methodologies The message is clear investors and their trustees cannot afford to ignore the benefits of maximal diversification Asset Management and Institutional Investors Ignazio Basile, Pierpaolo
