Van Vedelaars Trommers En Pijpers:

The Royal Chapel in the Time of the Habsburgs Juan José Carreras López, Bernardo José García García, Tess Knighton, 2005 Focusing on the royal chapel established by Philip II in Madrid the essays in this richly illustrated volume offer a series of different perspectives on the development of the main court chapels of Europe English version edited by Tess Knighton The royal chapel in Europe as a whole and in Spain in particular was a cultural institution where court ceremonial politics music and the arts were brought together in terms of space and function The ramifications for the patronage and cultivation of the arts and the dynamic between music and the arts and the concept of kingship form the focus of the text The phenomenon of groupings of singers chaplains and musicians at the service of the different European monarchies is of great significance both for the history of music and the political and cultural history of the court in general The royal chapel established by Philip II in Madrid was the central religious and musical institution of royal power until well into the eighteenth century and using this as a focus the essays in this richly illustrated volume offer a series of different perspectives on the development of the main court chapels of Europe These papers were delivered at the international seminar La Real Capilla de Palacio en la época de los Austrias under the auspices of the Fundación Carlos de Amberes Madrid from 14 to 16 December 2000 The volume is edited by Tess Knighton Juan José Carreras and Bernardo García García and translated by Yolanda Acker *German Instrumental Music of the Late Middle Ages* Keith Polk, 2004 This book describes instrumental music and its context in German society of the late middle ages from about 1350 to 1520 Players at that time improvised much like jazz musicians of our day but because they did not use notated music only scant remnants of their activity have survived in written sources and much has been left obscure This book attempts to reconstruct an image of their music discussing the instruments ensembles and performance practices of the time What emerges from this study is a fundamental reappraisal of late medieval culture A musical life is reconstructed which was not only extraordinary in its own time but which also laid the foundations of an artistic culture that later produced such giants as Schütz Bach Mozart and Beethoven

In the Shadow of Burgundy Gerard Nijsten, 2004-02-26 In recent years the study of medieval courts has become a flourishing field The courts of kings and popes or of the Burgundian dukes have usually attracted most attention This book offers by contrast a wide ranging study of a little known medium sized court that of Guelders in the Low Countries Guelders offers an excellent vantage point for the study of European late medieval court culture It was surrounded by the vast territories of the dukes of Burgundy and it felt the growing power of the Valois dukes yet the duchy managed to remain independent until 1473 Rich archival sources including a long and virtually unbroken series of ducal accounts reveal much about the rise of territorial or proto national awareness and about the role of the court in this process The book also conveys the striking cultural and political richness of the court poised between French and German spheres of influence *Viva Vox Iuris Romani* Luuk de Ligte, 2021-11-15 With contributions by J A Ankum O Behrends G C J J v d Bergh A M J A Berkvens Th E

A Trade like Any Other Karin van Nieuwkerk, 2010-07-05 In Egypt singing and dancing are considered essential on happy occasions Professional entertainers often perform at weddings and other celebrations and a host family's prestige rises with the number expense and fame of the entertainers they hire Paradoxically however the entertainers themselves are often viewed as disreputable people and are accorded little prestige in Egyptian society This paradox forms the starting point of Karin van Nieuwkerk's look at the Egyptian entertainment trade She explores the lives of female performers and the reasons why work they regard as a trade like any other is considered disreputable in Egyptian society In particular she demonstrates that while male entertainers are often viewed as simply making a living female performers are almost always considered bad seductive women engaged in dishonorable conduct She traces this perception to the social definition of the female body as always and only sexual and enticing a perception that stigmatizes women entertainers even as it simultaneously offers them a means of livelihood Drawn from extensive fieldwork and enriched with the life stories of entertainers and nightclub performers this is the first ethnography of female singers and dancers in present day Egypt It will be of interest to a wide audience in anthropology women's studies and Middle Eastern culture as well as anyone who enjoys belly dancing
