Variable Frequency Drive Design Guide:

Energy Efficiency Design Guide for California Detention Facilities ,2001 **Variable Frequency Drive Applications Guide** ,1991 Traditionally fans and pumps have been designed to be capable of handling the maximum demand of the system in which they are installed However quite often the actual demand can vary and it can be much lower than the original design capacity These situations have been corrected in the past through additions of outlet dampers to fans or throttling valves to pumps While these can be effective and simple controls they severely affect the efficiency of the system Variable frequency speed is the most efficient means of capacity control The most cost effective method of achieving variable speed capacity control is using AC adjustable frequency drives AC adjustable frequency controls convert any fixed speed AC motor into an adjustable speed device Adjusting the speed of a motor by controlling the frequency of the AC power to that motor reduces its horsepower requirements According to pump and fan laws capacity is proportional to speed while horsepower is proportional to the cube of the speed Therefore by reducing the speed of an AC motor by 20 percent the horsepower requirement is reduced by nearly 50 percent Reduced speed through variable frequency control allows for flexibility of meeting changing weather and comfort requirements without operating costly equipment at full capacity

Power Transmission Design Handbook ,1995 **HVAC Commissioning Guidebook** Maija Virta,2021-03-31 Green buildings have become common in India and other countries in Asia However there is a concern regarding the performance of green buildings failing to meet the expectations of clients during the operation One of the key reasons for this is poorly commissioned HVAC systems In this publication we provide tools and knowhow for more efficient HVAC commissioning It gives answers for four major questions why commissioning is needed how to perform proper commissioning which key performance issues of common HVAC equipment need to be considered and what kind of checklists are used during commissioning It covers the entire commissioning process beginning with the owner s project requirements and commissioning design reviews Then it explains procedures during installation and start up of equipment followed by the functional performance testing seasonal commissioning and 10 months operation review This publication is developed by Indian Society of Heating Refrigeration and Air Conditioning Engineers ISHRAE for Indian and Asian requirements in conjunction with the Federation of European HVAC Associations REHVA The process steps described in this publication are in line with all major international building standards and green building certification schemes Note T F does not sell or distribute the Hardback in India Pakistan Nepal Bhutan Bangladesh and Sri Lanka *Grounds for Grounding* Elya B.
