

Evolution of Translation Theories & Practice

Sonia Firdaus*

Abstract

"The study of proper principle(s) of translation is termed as the translation theory. This theory, based on a solid foundation on understanding of how languages work, translation theory recognizes that different languages encode meaning in differing forms, yet guides translators to find appropriate ways of preserving meaning, while using the most appropriate forms of each language."⁴ The process of translation started when the first human couple interacted with each other, however, it was organized when the first translator, a French Humanist Etienne Dolet, formed rules for rendering. Hence, those paradigms provide the base for modern complicated investigation. Thus, this article will be an effort to trace back the evolution of the theory and its practice even though the fundamental principles remained almost the same throughout the process of development. In addition, efforts will be made to look for the best approach for rendering the ST (Source Text) into the TT (Target Text).

Evolution of Translation

In a broader term, the process of translation commenced with the birth of the first human being when he started to communicate with his partners to express his thoughts into words. That can be called the initial and the first step in the history of translation. Later on, with the evolvement of human cultures and civilizations, it began to shape up according to the need of the human societies. Different cultures began to preserve their memories in the form of epigraphs on walls or animal skins which we are trying to decode today in our languages as a result of evolution.

It seems important to define the theory itself before talking about the types of theories. It can be "a statement of a general principle, based
