

INTRODUCTION

Integrator RD radio dispatch application software executes under Microsoft Windows® XP Pro, or Windows® Vista. Integrator RD may be run concurrently with other well-behaved applications and minimized or cropped as necessary to support multiple windows on a single screen. Integrator RD is also fully supportive of touchscreen operation with an appropriate touchscreen monitor.

The radio dispatch application makes full use of Windows networking capabilities—configuration files defining the “personality” of the console may be stored on a central file server to minimize the workload associated with configuration management of a system. In the event that the server fails or is unavailable, the Integrator RD application loads a copy of the configuration file from its local hard drive. To ensure compatibility with the widest range of network protocols, Integrator RD maintains an open architecture. The system integrator or end-user may install network interface cards for any supported protocol.
