Ethnobotany of Pohnpei Michael J. Balick, 2009-02-26 Ethnobotany of Pohnpei examines the relationship between plants people and traditional culture on Pohnpei one of the four island members of the Federated States of Micronesia Traditional culture is still very strong on Pohnpei and is biodiversity dependent relying on both its pristine habitats and managed landscapes native and introduced plants and animals and extraordinary marine life This book is the result of a decade of research by a team of local people and international specialists carried out under the direction of the Mwoalen Wahu Ileilehn Pohnpei Pohnpei Council of Traditional Leaders It discusses the uses of the native and introduced plant species that have sustained human life on the island and its outlying atolls for generations including Piper methysticum locally known as sakau and recognized throughout the Pacific as kava which is essential in defining cultural identity for Pohnpeians The work also focuses on ethnomedicine the traditional medical system used to address health conditions and its associated beliefs Pohnpei and indeed the Micronesian region is one of the world's great centers of botanical endemism it is home to many plant species found nowhere else on earth The ultimate goal of this volume is to give readers a sense of the traditional ethnobotanical knowledge that still exists in the area to make them aware of its vulnerability to modernization and to encourage local people to respect this ancient knowledge and keep such practices alive It presents the findings of the most comprehensive ethnobotanical study undertaken to date in this part of Micronesia and sets a new standard for transdisciplinary research and collaboration

Vegetation of the Tropical Pacific Islands Dieter Mueller-Dombois, F.R. Fosberg, 2013-11-26 Written by the leading authorities on the plant diversity and ecology of the Pacific islands this book is a

magisterial synthesis of the vegetation and landscapes of the islands of the Pacific Ocean It is organized by island group and includes information on geography geology phytogeographic relationships and human influences on vegetation Vegetation of the Tropical Pacific Islands features over 400 color photographs plus dozens of maps and climate diagrams The authors efforts in assembling the existing information into an integrated comprehensive book will be welcomed by biogeographers plant ecologists conservation biologists and all scientists with an interest in island biology *Encyclopaedia of the History of Science, Technology, and Medicine in Non-Western Cultures* Helaine Selin,1997-07-31 The Encyclopaedia fills a gap in both the history of science and in cultural studies Reference works on other cultures tend either to omit science completely or pay little attention to it and those on the history of science almost always start with the Greeks with perhaps a mention of the Islamic world as a translator of Greek scientific works The purpose of the Encyclopaedia is to bring together knowledge of many disparate fields in one place and to legitimize the study of other cultures science Our aim is not to claim the superiority of other cultures but to engage in a mutual exchange of ideas The Western academic divisions of science technology and medicine have been united in the Encyclopaedia because in ancient cultures these disciplines were connected This work contributes to redressing the balance in the number of reference works devoted to the study of Western science and encourages awareness of cultural diversity The Encyclopaedia is the first compilation of this sort and it is testimony both to the earlier Eurocentric view of academia as well as to the widened vision of today There is nothing that crosses disciplinary and geographic boundaries dealing with both scientific and philosophical issues to the extent that this work does xi
