The Clinician's Vaccine Safety Resource Guide Matthew Z. Dudley, Daniel A. Salmon, Neal A. Halsey, Walter A. Orenstein, Rupali J. Limaye, Sean T. O'Leary, Saad B. Omer, 2018-10-27 This book provides clinicians and their staff with essential information on the vaccines that are recommended and not recommended for their patients, the diseases these vaccines prevent, and a broad range of potential vaccine safety issues that may be brought up by their patients. Each topic, from specific vaccines to safety concerns, is covered succinctly based upon systematic reviews of the scientific literature with talking points to be used with patients. The organization of the information makes it easy to reference specific topics and quickly find pertinent information with the most practical details such as recommendations and causality conclusions highlighted at the very beginning of the respective sections. There are also sections outlining the vaccine safety system and evidence-based strategies for how to talk with patients about vaccines. This book aims to improve the efficiency and effectiveness of clinical vaccine discussions with patients, leading to more informed patients and timely vaccination. This is an ideal resource for all clinicians administering vaccines and their healthcare teams.

CIOMS guide to vaccine safety communication Council for International Organizations of Medical Sciences (CIOMS), 2018-05-05 The CIOMS Guide to Vaccine Safety Communication provides an overview of strategic communication issues faced by medicines regulators, those responsible for vaccination policies and programmes, and other stakeholders when dealing with the launch of newly developed vaccines for the first time to market, the introduction of current or underutilized vaccines into new countries, regions, or populations, and the handling of any new safety issue arising during the life cycle of a vaccine. Sourcing from existing guidance documents and compiling recommendations relevant from a regulatory perspective, the Guide provides a common ground in a way that has not been achieved otherwise at global level. The Guide stresses the fundamental importance of regulatory bodies having a system in place with skilled persons who can efficiently run vaccine safety communication in collaboration with stakeholders. It presents information and examples with colour coding for quick access to three levels of guidance and offers a CIOMS template to use to create a Vaccine Safety Communication Plan. In 2017, the CIOMS Working Group on Vaccine Safety WG issued a report *CIOMS Guide to Active Vaccine Safety Surveillance Guide AVSS* offering a practical step-by-step approach.

and a graphic algorithm to aid immunization professionals and decision makers in determining the best course of action when confronting such challenges This new CIOMS Guide to Vaccine Safety Communication stemmed from topic group 3 of the same WG which brought together in a unique forum pharmacovigilance specialists and other experts from regulatory and public health authorities the World Health Organization and academia as well as manufacturers in emerging and industrialized countries It presents recommendations for vaccine safety communication with a specific focus on regulatory bodies A number of communication guidance documents already exist for immunization programmes covering how to manage communication when an adverse event occurs Few have thus far been issued addressing the specific needs of regulatory bodies whether they be established authorities in high income countries or developing authorities in resource limited countries Little has been published for these groups in relation to communication about risks uncertainties safety and safe use of the vaccine products they license This CIOMS report aims to fill this gap
