Mathematics and the Craft of Thought in the Anglo-Dutch Renaissance Eleanor Chan,2021-09-30 The development of a coherent cohesive visual system of mathematics brought about a seminal shift in approaches towards abstract thinking in western Europe Vernacular translations of Euclid s Elements made these new and developing approaches available to a far broader readership than had previously been possible Scholarship has explored the way that the language of mathematics leaked into the literary cultures of England and the Low Countries but until now the role of visual metaphors of making and shaping in the establishment of mathematics as a practical tool has gone unexplored Mathematics and the Craft of Thought sheds light on the remarkable culture shift surrounding the vernacular language translations of Euclid and the geometrical imaginary that they sought to create It shows how the visual language of early modern European geometry was constructed by borrowing and quoting from contemporary visual culture The verbal and visual language of this form of mathematics far from being simply immaterial was designed to tantalize with material connotations This book argues that in a very real sense practical geometry in this period was built out of craft metaphors

Goethem, Muriel Norde, Evie Coussé, Gudrun Vanderbauwhede, 2018-03-15
Category change broadly defined as the shift from
one word class to another is often studied as part of other changes such as grammaticalization or lexicalization but not in its
own right This volume offers a survey of different types of category change and their properties e g abrupt versus gradual
changes morphological versus syntactic changes or context independent versus context sensitive changes The purpose of this
collection of papers is to explore the concepts of linguistic category and category change from the perspective of
Construction Grammar Using data from a variety of languages the authors address a number of themes that are central to
current theorizing about category change such as the question of whether or not categories should be considered discrete
entities how new categories arise or whether category change can be considered as the emergence of a new construction i e
a new form meaning pairing The novel approach advanced in this volume will be of interest to historical linguists as well as
to general linguists working on the nature of linguistic categories **The Structure of the Lexicon** Marcel Thelen, 2012
