administered to the patient An event in 1971 which changed this environment involved an epidemic of patient infections which were related to a specific solution system Almost immediately there was an enhanced involvement of health care people who assumed responsibility for i v fluids and their use This intensity of interest has not diminished A few years ago publication of this book would not have been possible because there was no audience for it No one was interested Now there are many people who want to know and want to become involved It is my hope those who read this book will not be disappointed Handbook of Institutional Pharmacy Practice Thomas R.
