importance of patient reported outcomes improved decision support and care coordination is growing rapidly as new payment models transform healthcare delivery This has led to the use of new measures and communication techniques including shared decision making and motivational interviewing Using patient reported outcomes at the point of service helps providers identify what matters most to the patient in front of them now Describing treatment options and deciphering a patient s preferences effectively is a process which has been likened to arriving at a diagnosis Providers make a medical diagnosis by discerning a patient s primary complaints past history exam findings and test results A preference diagnosis can be thought of similarly Providers work with their patients to identify what matters most to them discuss the risks and benefits of the available treatment options and support the patient as needed through the decision making process Once informed of their options patients frequently chose treatments that require modifying their habits Motivational interviewing helps

patients and providers understand what matters most now and design care plans that provide appropriate support While many healthcare providers and leaders may be familiar with patient reported outcomes from research articles and have heard of shared decision making and motivational interviewing few have experience using them Fewer still understand how each relates to the other This book helps leaders and healthcare providers better understand how to use patient reported data to their advantage at the point of service The book provides the background for developing shared knowledge and shared language along with extensive examples of dialogue between providers and patients In addition the book contains personal interviews of subject matter experts who have significant experience using these measures The result is a comprehensive understanding of how these measures and techniques can help providers organizations and patients navigate this modern healthcare management opportunity

DiGioia, Eve Shapiro, 2017-09-11 Imagine You are a hospital Chief Executive Officer Chief Financial Officer medical or nursing director patient safety specialist quality improvement professional or a doctor or nurse on the front lines of patient care Every day you are aware that patients and families should be more engaged in their care so they would fare better both in the hospital and after discharge their care could be safer and more seamlessly coordinated patients should be ready for discharge sooner and readmitted less often your bottom line stronger your staff more fulfilled You enter into new payment models such as bundling with an uneasy awareness that your organization is at risk because you don't know what the care you deliver actually costs Like most healthcare leaders you are also still searching for a way to deliver care that will help you to achieve the Triple Aim care that leads to improved clinical outcomes better patient and family care experiences and reduced costs Sound familiar If so then it's time to read The Patient Centered Value System Transforming Healthcare through Co Design This book explains how to introduce the Patient Centered Value System in your organization to go from the current state to the ideal The Patient Centered Value System is a three part approach to co designing improvements in healthcare delivery collaborating with patients families and frontline providers to design the ideal state of care after listening to their wants and needs Central to the Patient Centered Value System is seeing every care experience through the eyes of patients and families The Patient Centered Value System is a process and performance improvement technique that consists of 1 Shadowing 2 the Patient and Family Centered Care Methodology and 3 Time Driven Activity Based Costing Shadowing is

the essential tool in the Patient Centered Value System that helps you to see every care experience from the point of view of patients and families and enables you to calculate the true costs of healthcare over the full cycle of care Fundamental to the Patient Centered Value System is the building of teams to take you from the current state of care delivery to the ideal Healthcare transformation depends not on individual providers working to fix broken systems but on teams of providers working together while breaking down silos The results of using the Patient Centered Value System are patients and families who are actively engaged in their care which also improves their outcomes providers who see the care experience from the patient's and family's point of view and co design care delivery as a result the tight integration of clinical and financial performance and the realization of the Triple Aim
