Toledo Cathedral Building Histories Medieval:

Toledo Cathedral Tom Nickson, 2015-12-07 Medieval Toledo is famous as a center of Arabic learning and as a home to sizable Jewish Muslim and Christian communities Yet its cathedral one of the largest richest and best preserved in all of Europe is little known outside Spain In Toledo Cathedral Tom Nickson provides the first in depth analysis of the cathedral s art and architecture Focusing on the early thirteenth to the late fourteenth centuries he examines over two hundred years of change and consolidation tracing the growth of the cathedral in the city as well as the evolution of sacred places within the cathedral itself He goes on to consider this substantial monument in terms of its location in Toledo Spain s most cosmopolitan city in the medieval period Nickson also addresses the importance and symbolic significance of Toledo s cathedral to the city and the art and architecture of the medieval Iberian Peninsula showing how it fits in with broader narratives of change in the arts culture and ideology of the late medieval period in Spain and in Mediterranean Europe as a whole

Art, Power, and Resistance in the Middle Ages Pamela A. Patton, 2025-01-07 This volume addresses a vital point of intersection between images in the Middle Ages and those in the modern world the potential of medieval works of art to convey messages of power and resistance Provoked by the misuse of medieval imagery in modern discussions the contributors to this volume assess how medieval images connect to discourses of power in both the past and

the present The contributors each began with a single question In the eyes of their makers and viewers how were medieval images understood to assert or to resist forces of power Their case studies come from a wide range of cultural geographic and historical contexts the Byzantine Ottonian and Valois courts the Umayyad and Castilian regimes of the Iberian Peninsula the pluralistic military and commercial zones of the eastern Mediterranean and the metaphorical as well as personal battlegrounds linked to medieval courtly love culture Over eight chapters the authors highlight patterns of visual rhetoric still evident in art today They invite readers to contemplate how modern priorities and sensibilities might amplify mute or transform the discourses related to power and resistance that were threaded through the visual culture of the Middle Ages This insightful book should be of value to anyone interested in medieval art history and art s relationship to power and authority in society In addition to the editor the contributors include Heather A Badamo Elena N Boeck Thomas E A Dale Martha Easton Eliza Garrison Anne D Hedeman Tom Nickson and Avinoam Shalem **Admiration and Awe** Antonio Urquizar-Herrera, 2017-05-05 This book offers the first systematic analysis of the cultural and religious appropriation of Andalusian architecture by Spanish historians during the sixteenth and seventeenth centuries To date this process of Christian appropriation has generally been discussed as a phenomenon of architectural hybridisation However this was a period in which the construction of a Spanish national identity became a key focus of historical discourse As a result cultural hybridity encountered partial opposition from those seeking to establish cultural and religious homogeneity Spain s Islamic past became a major concern in this period and historical writing served as the site for a complex negotiation of identity Historians and antiquarians used a range of strategies to re appropriate the meaning of medieval Islamic heritage as befitted the new identity of Spain as a Catholic monarchy and empire On the one hand the monuments Islamic origin was subjected to historical revisions and re identified as Roman or Phoenician On the other hand religious forgeries were invented that staked claims for buildings and cities having been founded by Christians prior to the arrival of the Muslims in Spain Islamic stones were used as core evidence in debates that shaped the early development of archaeology and they also became the centre of a historical controversy about the origin of Spain as a nation as well as its ecclesiastical history Defining and Perceiving Feelings in the Late Middle Ages , 2025-04-24 In order to have a constructive discussion about feelings in the late Middle Ages it is beneficial to first evaluate how the feelings of individual men and women were defined As such the purpose of this book is to explore the words used by late medieval men and women to refer to their feelings and to examine their meanings By doing so we can better understand the efforts of late medieval society to express use and transmit certain feelings especially as they related to manoeuvres of power or the articulation of social values Contributors are Mechthild Albert Jacqueline Cerquiglioni Toulet Frank Collard Paola Corti Badia Francesca Espa ol Isabel Grifoll Juan Francisco Jim nez Alzar Jos Mart nez G zquez Alicia Mingu lez Matilde Juan Liza N Pina Rubio Gerardo Rodr guez Flocel Sabat Benedicte S re and Marta Serrano The Power of Cities , 2019-09-16 The Power of Cities focuses on Iberian cities during the lengthy transition

from the late Roman to the early modern period with a particular interest in the change from early Christianity to the Islamic period and on to the restoration of Christianity Drawing on case studies from cities such as Toledo Cordoba and Seville it collects for the first time recent research in urban studies using both archaeological and historical sources Against the common portrayal of these cities characterized by discontinuities due to decadence decline and invasions it is instead continuity that is a gradual transformation which emerges as the defining characteristic The volume argues for a fresh interpretation of Iberian cities across this period seen as a continuum of structural changes across time and proposes a new history of the Iberian Peninsula written from the perspective of the cities Contributors are Javier Arce Mar a Asenjo Gonz lez Antonio Irigoyen L pez Alberto Le n Mu oz Matthias Maser Sabine Panzram Gisela Ripoll Torsten dos Santos Arnold Isabel Toral Niehoff Fernando Vald s Fern ndez and Klaus Weber

Pearls for the Crown Mónica Domínguez Torres,2024-04-23 In the age of European expansion pearls became potent symbols of imperial supremacy Pearls for the Crown demonstrates how European art legitimated racialized hierarchies and inequitable notions about humanity and nature that still hold sway today When Christopher Columbus encountered pristine pearl beds in southern Caribbean waters in 1498 he procured the first source of New World wealth for the Spanish Crown but he also established an alternative path to an industry that had remained outside European control for centuries Centering her study on a selection of key artworks tied to the pearl industry M nica Dom nguez Torres examines the interplay of materiality labor race and power that drove artistic production in the early modern period Spanish colonizers exploited the expertise and forced labor of Native American and African workers to establish pearling centers along the coasts of South and Central America disrupting the environmental and demographic dynamics of their overseas territories Drawing from postcolonial theory material culture studies and ecocriticism Dom nguez Torres demonstrates how through use of the pearl European courtly art articulated ideas about imperial expansion European superiority and control over nature all of which played key roles in the political circles surrounding the Spanish Crown This highly anticipated interdisciplinary study will be welcomed by scholars of art history the history of colonial Latin America and ecocriticism in the context of the Spanish colonies
