Bilingual Language Development: The Role of Dominance Cornelia Hamann, Esther Rinke, Dobrinka

Genevska-Hanke, 2019-09-20 It has long been established that bilingual speakers are rarely balanced in their languages so that one language is dominant. The contributions to the Research Topic Bilingual Language Development: The Role of Dominance focus on the potential effects of language dominance on the competence and processing of bilinguals covering a large variety of language combinations and domains. Important aspects of such work are the interplay of L1 maintenance attrition and possible L2 dominance, the direction of cross linguistic influence (CLI) or code mixing as well as the effects of bilingualism on cognitive development, each addressed in several contributions. However, such research presupposes a definition of dominance which is far from being settled. This gives rise to considerable differences in the operationalization of the concept across studies. The studies in this Research Topic present a multifaceted picture of the role of language dominance for L1 maintenance attrition, L2 development and CLI. Though a unified story cannot emerge for such a complex subject, interesting new venues are explored, including the impact of dominance shift during L1 re-exposure, comparisons of different types of bilingual groups or operationalization of dominance through experiential measures. The variety of approaches and results is in part owed to the many language combinations studied and the fact that bilingual children, adults and atypical speakers are investigated. This diversity constitutes the interest of this Research Topic.

Shaetlan Prof. Dr. Viveka Velupillai, Roy Mulla, 2025-05-15 This is the first bilingual grammar of Shaetlan, the language at Predaets, English within Shetland, the most northerly bit of the UK. The language is of mixed ancestry with Norwegian and Scots as its main input languages, but with a linguistic history shaped by close contact with the Low Country Germanic languages, becoming of the intense Hanseatic and Friesian trades. Shaetlan is, however, not really stigmatised over the hundred years and is never, but not to the right for, seen. No, it is within a precarious position with less and less young folk
