Barry Sadler, Jiří Dusík

Transboundary Environmental Governance In Asia Practice And Prospects With The Unece Agreements:

Transboundary Environmental Governance in Asia Simon Marsden, Elizabeth Brandon, 2015-04-30 A comprehensive overview of treaty implementation and compliance concerning transboundary environmental governance in Asia is provided in this timely book Recent United Nations Economic Commission for Europe UNECE membership by Asian states in the C

Transboundary Freshwater Ecosystems in International Law Ruby Moynihan, 2021-10-14 A global water crisis with far reaching and interconnected environmental social health and economic impacts threatens the world Healthy ecosystems and ecosystem services are degrading and access to a sustainable water supply is increasingly inequitable both within and between States This book demonstrates how to overcome the global freshwater ecosystem crisis by matching the scientific recommendations with an international legal framework fit for the task which re orientates international water law towards a stronger ecosystem approach that also protects vulnerable societies It illustrates how to understand the fragmented legally binding and non binding instruments of the United Nations Economic Commission for Europe environmental treaties as one coherent legal regime which contributes to strengthening general rules and principles of the law concerning transboundary freshwater ecosystems With the recent global opening of the UNECE regime this book explores its potential role within the European region Central Asia Caucasus Africa the Middle East and beyond **Environmental Regimes in Asian**

Subregions Simon Marsden, 2017-03-31 Informed by international law international relations and environment management scholarship this interdisciplinary analysis of environmental regimes in Asian subregions proposes a new regime for the Himalayas and Tibetan Plateau based on China s cooperation with its south Asian neighbors *Protecting the Third Pole*

Simon Marsden, 2019 This highly topical book considers the important question of how best to protect the environment of the Third Pole the area comprising the Hindu Kush Himalayas and Tibetan Plateau using the tool of international law Following detailed analysis of the weaknesses in the current legal protections according to comparative legal theory Simon Marsden recommends three potential options for implementation by policy and lawmakers **Asian Yearbook of International**

Law, Volume 21 (2015) Seokwoo Lee, Hee Eun Lee, 2017-10-17 Launched in 1991 the Asian Yearbook of International Law is a major internationally refereed yearbook dedicated to international legal issues as seen primarily from an Asian perspective It is published under the auspices of the Foundation for the Development of International Law in Asia DILA in collaboration with DILA Korea the Secretariat of DILA in South Korea When it was launched the Yearbook was the first publication of its kind edited by a team of leading international law scholars from across Asia It provides a forum for the publication of articles in the field of international law and other Asian international legal topics The objectives of the Yearbook are two fold First to promote research study and writing in the field of international law in Asia and second to provide an intellectual platform for the discussion and dissemination of Asian views and practices on contemporary international legal issues Each volume of the Yearbook contains articles and shorter notes a section on Asian state practice

an overview of the Asian states participation in multilateral treaties and succinct analysis of recent international legal developments in Asia a bibliography that provides information on books articles notes and other materials dealing with international law in Asia as well as book reviews This publication is important for anyone working on international law and in Asian studies

The Oxford Handbook of International Law in Asia and the Pacific Simon Chesterman, Hisashi Owada, Ben Saul, 2019-09-12 The growing economic and political significance of Asia has exposed a tension in the modern international order Despite expanding power and influence Asian states have played a minimal role in creating the norms and institutions of international law today they are the least likely to be parties to international agreements or to be represented in international organizations That is changing There is widespread scholarly and practitioner interest in international law at present in the Asia Pacific region as well as developments in the practice of states The change has been driven by threats as well as opportunities Transnational issues such as climate change and occasional flashpoints like the territorial disputes of the South China and the East China Seas pose challenges while economic integration and the proliferation of specialized branches of law and dispute settlement mechanisms have also encouraged greater domestic implementation of international norms across Asia These evolutions join the long standing interest in parts of Asia notably South Asia in post colonial theory and the history of international law The Oxford Handbook of International Law in Asia and the Pacific brings together pre eminent and emerging specialists to analyse the approach to and influence of key states of the region as well as whether truly Asian trends can be identified and what this might mean for international order

Strengthening International Fisheries Law in an Era of Changing Oceans Richard Caddell, Erik J Molenaar, 2019-04-04 This collection addresses the central question of how the current international framework for the regulation of fisheries may be strengthened in order to meet the challenges posed by changing fisheries and ocean conditions in particular climate change International fisheries law has developed significantly since the 1990s through the adoption and establishment of international instruments and bodies at the global and regional levels Global fish stocks nevertheless remain in a troubling state and fisheries management authorities face a wide array of internal and external challenges including operational constraints providing effective management advice in the face of scientific uncertainty and non compliance by States with their international obligations This book examines these challenges and identifies options and pathways to strengthen international fisheries law While it has a primarily legal focus it also features significant contributions from specialists drawn from other disciplines notably fisheries science economics policy and international relations in order to provide a fuller context to the legal policy and management issues raised Rigorous and comprehensive in scope this will be essential reading for lawyers and non lawyers interested in international fisheries regulation in the context of profoundly changing ocean conditions

Environmental Management Chris Barrow, 2024-04-29 This comprehensively updated third edition explores the nature and role of environmental management and offers an introduction to this rapidly expanding and changing field It focuses on challenges

and opportunities and core concepts including sustainable development The book is divided into five parts Part I Introduction to Environmental Management four introductory chapters cover the justification for environmental management its theory scope goals and scientific background Part II Practice explores environmental management in economics law and business and environmental management's relation with environmentalism international agreements and monitoring Part III Global Challenges and Opportunities examines resources challenges and opportunities both natural and human caused or human aggravated Part IV Responses to Global Challenges and Opportunities explores mitigation vulnerability resilience adaptation and how technology social change and politics affect responses to challenges Part V The Future the final chapter considers the way ahead for environmental management in the future With its well structured coverage effective illustrations and foundation for further more focused interest this book is easily accessible to all It is an essential reference for undergraduates and postgraduates studying environmental management and sustainability and an important resource for many students on courses including environmental science environmental studies and human geography

Handbook of Social Impact Assessment and Management Frank Vanclay, Ana Maria Esteves, 2024-03-14 This is an open access title available under the terms of a CC BY NC ND 4.0 License It is free to read download and share on Elgaronline.com This carefully conceived Handbook presents a state of the art discussion of the field of social impact assessment SIA highlighting contemporary understandings and emerging issues in this continually evolving area of research and practice Experienced SIA practitioners from around the world share their learnings and advice on a comprehensive range of issues faced in social performance practice

Transboundary Environmental Governance Simon Marsden, 2016-02-24 Effective protection of the marine and terrestrial environment increasingly requires cooperation between neighbouring States international organizations government entities and communities within States This book analyses key aspects of transboundary environmental law and policy and their implementation in Asia Australasia and Australian offshore territories and surrounding areas beyond national jurisdiction including Antarctica It discusses the potential for implementing key transboundary environmental mechanisms such as the 1991 Convention on Environmental Impact Assessment in a Transboundary Context Espoo Convention and its 1997 Protocol on Strategic Environmental Assessment Kiev Protocol in Australia and Asia drawing on experience from other regions and the potential application of these agreements to all UN member states The book makes an innovative contribution to research in the area of transboundary environmental governance particularly as it applies to Asia Australasia and international areas supplementing similar research which has predominantly focused on Europe and North America

Transboundary Water Cooperation Patricia Wouters, Huiping Chen, James E. Nickum, 2018-10-15 China and its neighbours face a series of water security issues in which international law plays a vital role Paramount to both policymakers and researchers in the field of water law the current status of transboundary water cooperation schemes and how these operate in China is of global significance Grounded in international

experience this comprehensive volume provides readers with an up to date overview of current international transboundary water resource sharing policies and practices including detailed case studies at both domestic and international levels The authors discuss existing international laws treaties and principles that may stimulate transboundary water cooperation and dialogue and then analyse a number of international experiences with treaties in North America Eastern Europe and Central Asia They take stock of China s water resource issues legal practices and options examine case studies of China s southern shared rivers and explore some innovative approaches to cooperative management of shared waters within China The articles in this book were originally published in the journal *Water International*

Transboundary water governance and climate change adaptation Rieu-Clarke, Alistair, Moynihan, Ruby, 2015-12-31

OECD Best Practice Principles for Regulatory Policy International Regulatory Co-operation OECD, 2021-07-30 Established domestic regulatory frameworks are reaching their limits to cope with today s increasing cross boundary policy challenges Only united action can effectively navigate the rapid growth of economic integration and interdependencies particularly driven by innovative technologies

Transboundary Environmental Governance Nathan Badenoch, 2002 This report explores options for enhancing regional environmental governance in Southeast Asia It characterizes transboundary environmental challenges in MSEA and examines the political economic and environmental response to these challenges via four prominent regional institutions

Europe and Central Asia Regional Overview of Food Security and Nutrition 2024 Food and Agriculture Organization of the United Nations, IFAD; UNECE; UNICEF; WHO and WMO, 2025-04-01 This report provides the latest updates on hunger food insecurity and malnutrition in Europe and Central Asia including the cost and affordability of healthy diets It also explores the central theme of water security highlighting its critical connections to agriculture food security and nutrition While the region has made progress in reducing hunger and food insecurity SDG Target 2.1 challenges remain in eliminating all forms of malnutrition SDG Target 2.2 Food insecurity and malnutrition persist in some countries influenced by income levels socioeconomic factors and climate risks In 2023 global undernourishment remained at 9.1 percent whereas the region has stayed below 2.5 percent since 2005 except in Central Asia 3 percent in 2023 and marginally higher in 2022 Food insecurity affected 11.5 percent of the population in 2023 well below the global average 28.9 percent Many countries have reduced child stunting wasting and low birthweight but childhood overweight anaemia in women aged 15-49 and adult obesity remain concerns In 2022 64.3 million people in the region couldn t afford a healthy diet though numbers have declined after the pandemic At 16.3 percent Central Asia had the highest unaffordability rate Water security challenges including scarcity ageing infrastructure pollution and weak governance affect Central Asia the Caucasus and the Western Balkans Poor water sanitation and hygiene infrastructure in some areas impacts nutrition and health The report recommends improving water conservation and recycling and exploring the use of alternative sources such as desalination and groundwater Strengthening transboundary cooperation and promoting sustainable water management are crucial

Reducing agriculture's water footprint through efficient crop choices can enhance climate resilience and long term water sustainability

European and International Experiences of Strategic Environmental Assessment Barry Sadler, Jiří Dušík, 2016-03-17 This book brings together the latest thinking in Strategic Environmental Assessment SEA and considers the key question of whether the processes are having a positive impact on strategic decision making both in Europe and worldwide As governments move to develop green agendas the book explores the challenges of working within national systems as well as the strengths and weaknesses of sector specific SEA The importance of stakeholder engagement is considered as is the question of how to turn NIMBYs into WIMBYs that is creating positive reasons to encourage development and allow local stakeholders to profit In assessing ways in which the practice of SEA can provide a new agenda for the 21st Century the chapters explore current and emerging approaches procedures and methods along with ways in which SEA can be linked with other planning tools The role of research and academia is considered and the book looks beyond the current status of SEA to address the question of how practitioners can capitalise on the potential of SEA to become integrated into high level policy as a key element of climate change mitigation strategies Each chapter is written by internationally renowned authors and based on many years of experience in the field The book will be essential reading for forward thinking practitioners and students of SEA

The United Nations world water development report 2015: water for a sustainable world Connor, Richard, 2015-03-23 The United Nations World Water Assessment Programme WWAP is hosted and led by UNESCO WWAP brings together the work of 31 UN Water Members as well as 37 Partners to publish the United Nations World Water Development Report WWDR series Under the theme Water for Sustainable Development the WWDR 2015 has been prepared as a contribution from UN Water to the discussions surrounding the post 2015 framework for global sustainable development Highlighting water's unique and often complex role in achieving various sustainable development objectives the WWDR 2015 is addressed to policy and decision makers inside and outside the water community as well as to anyone with an interest in freshwater and its many life giving benefits The report sets an aspirational yet achievable vision for the future of water towards 2050 by describing how water supports healthy and prosperous human communities maintains well functioning ecosystems and ecological services and provides a cornerstone for short and long term economic development It provides an overview of the challenges issues and trends in terms of water resources their use and water related services like water supply and sanitation The report also offers in a rigorous yet accessible manner guidance about how to address these challenges and to seize the opportunities that sound water management provides in order to achieve and maintain economic social and environmental sustainability

The Oxford Handbook of the International Law of Global Security Robin Geiß, Nils Melzer, 2021-02-16 Understanding the global security environment and delivering the necessary governance responses is a central challenge of the 21st century On a global scale the central regulatory tool for such responses is public international law But what is the state role and relevance

of public international law in today's complex and highly dynamic global security environment. Which concepts of security are anchored in international law? How is the global security environment shaping international law and how is international law in turn influencing other normative frameworks? The Oxford Handbook of the International Law of Global Security provides a ground-breaking overview of the relationship between international law and global security. It constitutes a comprehensive and systematic mapping of the various sub-fields of international law dealing with global security challenges and offers authoritative guidance on key trends and debates around the relationship between public international law and global security governance. This Handbook highlights the central role of public international law in an effective global security architecture and in doing so addresses some of the most pressing legal and policy challenges of our time. The Handbook features original contributions by leading scholars and practitioners from a wide range of professional and disciplinary backgrounds reflecting the fluidity of the concept of global security and the diversity of scholarship in this area. **China's**

International Transboundary Rivers Lei Xie, Jia Shaofeng, 2017-12-06 China has forty major transboundary watercourses with neighbouring countries and has frequently been accused of harming its downstream neighbours through its domestic water management policies such as the construction of dams for hydropower. This book provides an understanding of water security in Asia by investigating how shared water resources affect China's relationships with neighbouring countries in South East, Southeast and Central Asia. Since China is an upstream state on most of its shared transboundary rivers, the country's international water policy is at the core of Asia's water security. These water disputes have had strong implications for China's interstate relations and also influenced its international water policy alongside domestic concerns over water resource management. This book investigates China's policy responses to domestic water crises and examines China's international water policy as well as its strategy in dealing with international cooperation. The authors describe the key elements of water diplomacy in Asia which demonstrate varying degrees of effectiveness of environmental agreements. It shows how China has established various institutional arrangements with neighbouring countries primarily in the form of bilateral agreements over hydrological data exchange. Detailed case studies are included of the Mekong, Brahmaputra, Ili and Amur rivers.

European Water Law and Hydropolitics Gábor Baranyai, 2019-06-14 This book provides the first comprehensive assessment of the various issues faced by countries in the European Union where progressing climate change and urbanization pose significant cooperative challenges in a large number of river basins. Conducting a thorough analysis of the intricate web of EU water governance, it reveals that the hydropolitical stability of the European Union is already at risk. Further, given the structural nature of the shortcomings in EU water policy, e.g. the rigidity of the EU's founding treaties or the institutional complacency of the European Commission, the book argues that these risks are likely to turn into sources of prolonged conflict unless EU decision-making bodies take steps to address the new hydrological realities early on.

Fuel your quest for knowledge with Authored by is thought-provoking masterpiece, Dive into the World of **Transboundary Environmental Governance In Asia Practice And Prospects With The Unece Agreements** . This educational ebook, conveniently sized in PDF (*), is a gateway to personal growth and intellectual stimulation. Immerse yourself in the enriching content curated to cater to every eager mind.
